

Malawi

Operational Plan Report

FY 2011

Operating Unit Overview

OU Executive Summary

Background

Approximately 12% of the Malawian adult population is HIV-positive, with nearly one million people, including over 80,000 children currently living with HIV (UNAIDS 2008). An estimated 60,000 deaths in Malawi are attributed to HIV each year. The TB case detection rate in Malawi remains below 50% with 26,000 notified TB cases and an estimated burden of 48,000 TB cases in 2007. About 70% of TB patients are HIV-positive. However the Ministry of Health (MOH) notes that 97% of diagnosed TB patients received treatment; the TB notification rate was reduced by 1%, and cure rate of smear positives increased to 86% over the previous year. Malawi continues to rank in the lowest 10% of indicators in the Human Development Index. The under-five mortality rate is 175/1,000 live births, and nearly 2% of live births result in the mother's death.

Population growth has increased four-fold in the past two decades, and without more effective family planning programs, is on a trajectory to triple to an estimated 42,000,000 people by 2040. Unchecked population growth combined with limited reduction in HIV incidence will result in unsustainable human and economic costs for the Government of Malawi (GOM), including further strains on the already overburdened health care system. However, over the past year, reproductive health services have progressed, with skilled attendance at birth up to 58% at MCH sites.

Between July 2009 and June 2010, Malawi tested over 1.7 million people, of whom 53% were reported to be first-time testers. Over 12% of those accessing HIV Testing and Counselling (HTC) services were couples, and 9% of pregnant women tested HIV-positive. Approximately 735 sites provided HTC and 248 counsellors were trained and certified in the last fiscal year. The national PMTCT program has been rapidly scaled-up to more than 500 sites since 2008 and Malawi is on-track to provide HTC to 90% of pregnant women this year. In addition, 87% of those women received Cotrimoxazole and 32% of exposed infants received ARV prophylaxis.

Malawi has developed an ambitious plan to scale up access to ART for pregnant women through decentralizing the ART program into all 544 ANC sites nationally. Malawi has chosen to implement a modified Option B for PMTCT, and PMTCT providers will be trained to initiate ART in Maternal and Child Health (MCH) settings. This revised national program will be implemented by mid-2011, and the approach is expected to significantly increase ARV coverage for pregnant women from the current 35%, and significantly reduce MTCT by the end of 2012. By the end of June 2010, the national ART program had started 307,683 patients on ART, with 225,010 alive; an estimated 58% coverage of those in need. Approximately 9% of those initiated on ART in the second quarter of 2010 were children, and 61% of new patients were female.

Malawi's HIV epidemic is driven mainly by adult sexual behavior, with the majority of new sexually transmitted HIV infections occurring in long-term stable partnerships. Over 90% of new HIV infections among adults occur through individuals engaging in multiple and concurrent partnerships, and substantial transmission is driven by discordant couples. Malawi has made significant progress in male circumcision (MC) in 2010, with a completed WHO situation analysis, draft National Implementation Plan for MC, and newly drafted Standard Operating Procedures for Voluntary Medical Male Circumcision produced. In

addition, the MOH has committed to the creation of high-throughput 'MOVE' (the improved model for increased efficiency in circumcising high volumes of men by moving them through 4 beds at a time) sites at 3-4 hospitals in high prevalence districts, in an effort to provide sites for training providers, and to demonstrate national and international commitment to the implementation of MC. Malawi has applied for Global Fund support to implement MC in 2011; however, even if approved, the national program remains less than 50% funded, with USG providing 1/4 of the available resources.

Approximately 18 percent of all Malawian children (~1,000,000) are orphans and vulnerable children (OVC) with nearly 50% attributable to AIDS. Malawi's new Child Care, Protection & Justice Bill provides protection for children, including OVC, particularly because of their vulnerability to chronic poverty, food insecurity, child abuse, exploitation, and violence.

In July of 2010, the United States Government (U.S.) and the GOM officially signed a Partnership Framework Implementation Plan (PFIP) which was being operationalized during the FY2010 COP planning season. The Partnership Framework (PF) strategy which prioritized joint planning, country-led decision making, (country ownership principles), and sustainability of host country health delivery systems has become the cornerstone of PEPFAR's participation of the newly launched Global Health Initiative (GHI). Together with PMI and other Child Survival and Health programs, PEPFAR will continue to support Malawi to achieve its goals in the prevention, care and treatment of HIV/AIDS. The strategy will further fully align PEPFAR efforts to the Malawi GHI strategy which aims to assist the country reduce maternal, neonatal, and child, mortality and morbidity; decrease total fertility; and reduce new HIV infections.

HIV/AIDS Epidemic in Malawi:

- Adult HIV Prevalence: 11.9% (UNAIDS 2008)
- Estimated Number of HIV-infected People (adults and children): 930,000 (UNAIDS 2008)
- Estimated Number of Children Orphaned by AIDS: 560,000 (UNAIDS 2008)

FY2011 Budget

Technical Area	Budget Code	FY2009 PF	FY2010	FY2011
Prevention of Mother to Child Transmission	01 - MTCT	-	12,006,294	12,443,104
Sexual Prevention	02 - HVAB	1,287,447	5,240,472	4,507,850
	03 - HVOP	795,566	3,510,009	3,602,620
Biomedical Prevention	04 - HMBL	-	1,140,000	1,240,000
	05 - HMIN	-	275,000	100,000
	07- CIRC	1,562,380	1,513,168	4,252,770
Adult Care and Treatment	08 - HBHC	769,230	2,556,604	2,515,892
	09 - HTXS	-	1,289,082	1,666,541
Pediatric Care and Treatment	10 - PDCS	-	1,024,695	674,126
	11 - PDTX	-	591,957	748,275
TB/HIV	12 - HVTB	1,240,000	912,997	1,738,336
Orphans and Vulnerable Children	13 - HKID	2,410,770	3,949,388	4,602,924
HIV Counseling and Testing	14 - HVCT	309,607	3,446,036	3,859,373

ARV Drugs	15 - HTXD	-	233,916	-
Laboratory Infrastructure	16 - HLAB	-	3,563,783	3,359,075
Strategic Information	17 - HVSI	200,000	3,838,252	3,037,252
Health Systems Strengthening	18 - OHSS	9,425,000	5,730,310	8,679,934
Management and Operations	19 - HVMO	-	4,453,037	7,971,928
TOTAL		18,000,000	55,275,000	65,000,000

Targets to Achieve 3-12-12 Goals:

Redacted

Sustainability and Country Ownership

In May of 2010 Malawi was selected as one of 8 GHI “plus” countries. The Malawi PF and PFIP were adopted under the GHI strategy pillar to “reduce HIV Infections”. Both GHI and the PFIP support the national strategy for HIV/AIDS, the National Action Framework (NAF).

To address the Malawi HIV/AIDS epidemic, the goals of the PFIP, aligned to the NAF are to

- Reduce new HIV Infections in Malawi
- Improve the quality of treatment and care for Malawians impacted by HIV
- Mitigate the economic and psychosocial effects of HIV and AIDS and improve the quality of life for People Living with HIV (PLHIV), Orphans and Vulnerable Children (OVC) and other affected individuals and households
- Support the above listed goals in Prevention, Treatment and Care by providing discrete health systems strengthening support in five key areas – laboratory services, information systems, human resources, procurement and supply chain management and health finance

To promote sustainability and country ownership, USG Malawi has reconfigured its approach of assistance to the health sector to effectively speak as one U.S. government. The HIV Coordinating Team joined forces with PMI and other Child Survival in Health programs to form the Health Coordinating Team. We evaluated key elements of our portfolio and for FY2011, under PEPFAR have intensified support in the following areas:

- 1) Service Delivery including: Support for the integrated PMTCT/ART program; Support for PMTCT, MCH and Family Planning; Support for Medical Male Circumcision; Integration of nutrition efforts under PEPFAR and GHI, with Feed the Future; Support for Infrastructure
- 2) Support for Human Resources for Health including: Nurse Education; Training and Coordination by the MOH; Support for overall leadership, governance, management and accountability in the Health and HIV/AIDS sectors

PEPFAR’s model for developing the HIV/AIDS PF and the PFIP provides a solid example of USG’s

existing commitment to encourage country ownership and invest in country-led plans. The PF and PFIP were based on the country's NAF and were developed with significant collaboration with GOM. USG under PEPFAR will continue with this model by planning GHI with the same commitment. The USG has strategically aligned its planning to address Malawi's health and development goals in an integrated manner through participation in the design of national plans such as the National Strategy Application and Round 10 proposals to the GFATM. Programs were designed in the FY2011 COP to align and fill gaps around the GFATM. PEPFAR also plans to capitalize on U.S. strengths in providing strategic technical assistance to improve local capacity and to contribute to the sustainability of GOM's plans and systems.

Integration across the USG

As a GHI-plus country, USG Malawi's PEPFAR program is intensely pursuing smart integration across various program and technical areas with the goal of breaking down siloed delivery of care to Malawian clients. As a U.S. mission, PEPFAR is working with PMI and other Child Survival and Health programs to more effectively help Malawi deliver quality care. Partnerships with Education, Democracy and Governance, Economic Growth (Feed the Future) and Millennium Challenge Cooperation under GHI are also new in 2011.

Integration is also being driven by strategic coordination across PEPFAR partners funded by various agencies. USAID and CDC partners delivering service delivery will partner with CDC partner Baobab to scale-up new modules in electronic data systems to expand beyond HIV clinics to include TB/HIV services, MCH, FP, STI and out-patient services in high patient burden hospitals. USAID MC partner will scale up voluntary medical male circumcision services, and provide technical assistance through training for DOD partner the MDF, and CDC partners CHAM and MOH. A flagship "integrated support for service delivery" new procurement will bundle services for HIV, Malaria, FP/RH, MNCH, Nutrition and TB, offering one-stop shopping across 5 zones, 15 districts and reaching over 8 million Malawians.

Across program areas, PEPFAR will work with PMI to expand services for 500 village health clinics in hard-to-reach areas where young children access anti-malaria drugs and treatment for other common childhood illnesses. The health team will continue its partnership with the education team to provide scholarships to vulnerable girls, as a lack of education is a primary risk factor for early acquisition of HIV. The education program provides scholarships for vulnerable school-age girls to attend primary school at which point PEPFAR continues scholarships into secondary school.

Within other USG programs, PEPFAR has formed partnerships with the new MCC compact developers to leverage the private energy sector to make health investments in infrastructure deliver. Feeder roads developed under Feed the Future, households supported by Food for Peace, health policies strengthened under Democracy and Governance, and high efficiency cookstoves purchased with U.S dollars are all merging under common coordination to make wise, smart and timely decisions to help improve all health outcomes.

Health Systems Strengthening and Human Resources for Health

As a non-focus country under PEPFAR I, USG Malawi was mandated to leverage the substantial GFATM investments in Malawi to assist the national response to HIV/AIDS. Limited bilateral funds were heavily

invested into the health system which continues in our FY2011 planning. In the 2009–2010 health budget for Malawi, approximately 90 million dollars in health financing was provided by the GFATM. PEPFAR will directly support Global Fund coordination and implementation of HIV, TB, Malaria and Health Systems grants in the MOH through a senior management advisor previously funded under the GFATM liaison program. This person will not only facilitate coordination and implementation, but build capacity in the MOH to utilize and monitor these funds. PEPFAR continues to provide technical assistance to the national PMTCT, ART, Monitoring and Evaluation, TB, Counselling and Testing and Logistics programs, and will increase technical support to the MC program currently under development.

In PEPFAR II, implementing partners will provide technical assistance and direct support to the MOH and the Christian Health Association of Malawi (CHAM). In Malawi, CHAM provides 40 percent of public health services in rural and hard-to-reach areas of the country. Capacity support to CHAM through PEPFAR implementing partners will include pre-service training for Nurses and Nurse midwife technicians; faculty development for tutors and preceptors; HRH strengthening through identification and recruitment of tutors; clinical preceptors and students (including bursaries); faculty retention, curriculum revisions, in-service training for tutors including clinical and operations research; and, support for clinical teaching.

Also to further capacity building for health systems, PEPFAR will support reinforcement of the MOH training ability nationally, through the establishment of national training standards for integrated HIV care services including nutrition and other health priorities; accreditation of organizations and trainers; support to clinical mentoring and distance learning; strengthening of zonal health offices training and supervision capabilities; and implementation of the training system monitoring and reporting tool (TrainSMART) to accurately track data on training programs, trainers and trainees. PEPFAR will also support health informatics systems at the MOH Central Monitoring and Evaluation Division (CMED) and will fund the development of a database to regularly track health expenditure data.

In social welfare, PEPFAR will help in the development of a human resource information system (HRIS) for the Ministry of Gender, Child Development and Community Development (MOGCCD) to strengthen pre-service training for social work at Magomero Training College.

Through a new sector-wide award, PEPFAR will provide capacity building support to selected OVC sub partners transitioning from a partner whose award will end in 2011. Support to these organizations will:

- 1) Provide tailored capacity building on a range of organizational development issues, and provide technical support for program implementation
- 2) Assess capacity gaps in selected wider civil society groups beyond HIV/AIDS technical areas such as advocacy groups, networking bodies, professional and regulatory bodies. And based on this assessment, provide capacity building to position them to become leaders/drivers in their technical areas, and potentially USG primes

Another new sector-wide award will support coordination and leadership of national level advocacy. This award will facilitate GOM leadership and management across key areas of HR, M&E, strategic leadership and management, and supervision and policy development at central, district and zonal levels. It will further strengthen supervision systems and service training coordination at zonal and district levels. The award will help the GOM in its data systems development and utilization in HRIS and HMIS while providing capacity and technical support in the area of performance based financing.

Coordination with Other Donors and the Private Sector

The Global Fund is the largest donor to Malawi's health sector, having approved a total of \$540,867,090 and provided a total of \$342,782,281 in support for HIV/AIDS, TB and Malaria since 2003. Of this support, 80% is for HIV/AIDS prevention, care and treatment. In addition to the Global Fund, other major donors include the United Kingdom, Norway, Germany, the European Union, and the World Bank. The Global Fund has approved seven grants to Malawi, totaling \$615 million over ten years for AIDS and TB programs. The primary HIV/AIDS coordinating body is the National AIDS Commission (NAC). In addition to working with NAC, USG meets regularly with key officials of individual Ministries (Health, Gender, Finance, Defense, Education and the Office of the President and Cabinet) to ensure that USG assistance complements and supports the Malawian Government's plans for prevention, care and treatment. A strategy for coordination for PEPFAR support was central to successfully developing the PF and PFIP with the GOM and civil society.

In FY2011, PEPFAR will support the private sector for the first time, in the sustainable provision and use of quality family planning, HIV/AIDS, and other health information, products, and services. PEPFAR's implementing partner will conduct an assessment of private health facilities in selected urban areas of Malawi and the findings will be used to promote greater private sector involvement in improving health in Malawi. This will involve providing technical assistance to develop and strengthen private provider networks and franchises and access to the Development Credit Authority for expansion of private health clinics.

Programmatic Focus

PEPFAR funding for FY 2011 will focus on the following programmatic areas to achieve the 3-12-12 goals:

1. Prevention:

Several new initiatives in FY2011 are planned to integrate child survival activities, family planning, malaria, safe motherhood, nutrition and TB, with HIV. With the expansion of existing partner's activities and the development of a flagship "support for service delivery award", the following major deliverables are expected:

- 1) Service Delivery: Training, mentoring and supervision for the delivery of PMTCT services and support health facilities and districts in the roll out of the new integrated ART/PMTCT guidelines
- 2) Finance: Implement performance-based financing at targeted health facilities
- 3) Male involvement: Provide hygiene kits to encourage male involvement and post natal care follow up; renovate high volume antenatal care clinics and labor and delivery wards in support of the GHI focus area. Sensitize communities to create demand, improve adherence, increase male

involvement and reduce stigma and discrimination. Promote couples counseling and testing and improve healthcare worker skill on couples counseling

- 4) Innovative approaches: Promote mobile phone and other communications technologies to improve health worker efficiency and effectiveness; strengthen MIP follow-up through community workers; assist DHOs and health facilities to adopt PQI approaches leverage cross-funding and MNCH funds and to ensure IYCF guidelines are revised in line with the WHO recommendations; strengthen provider initiated HTC
- 5) Improve quality: Provide sample transportation for EID and CD4; Train, mentor and supervise counselors and lab technicians; train health facility workers on injection safety; establish SOPs for injection safety; support DHO for monitoring and supervision
- 6) Linkages: Strengthen linkages between health services and HTC referral sources; assist DHOs and health facilities in EQA

Also in prevention, PEPFAR will support the integrated PMTCT/ART program at the central level by evaluating the process and impact of program integration and decentralization through expansion to MCH settings. This will assist MOH determine whether integration improves reduction in vertical transmission, increases follow-up of mother-infant pairs, and increases access to early infant diagnosis. The program will also develop and print guidelines for integrated ART/PMTCT, training curriculum and manuals, and procure equipment needed to support the national integrated ART/PMTCT program. The program will then conduct training in integrated HTC/TB/Pre-ART/ART/PMTCT training and complete minor refurbishments of ART/PMTCT sites.

Quality assurance will also involve conducting quarterly integrated supervision to service delivery sites. Lab partners will support MOH to develop, implement and monitor a comprehensive national HIV rapid testing QA program; scale up of a national sample transportation and referral mechanism for EID that will inform MOH for the national system required to support the new ART regimen.

Another major element of PMTCT services involves strengthening and expanding electronic data systems (EDS). Expansion of patient tracing activities to follow women in ANC sites and to track mother/infant pairs and pre-ART patients using EDS will further support PMTCT. Training, mentoring, and technical leadership will be supported to increase the quality and impact of PMTCT services in the following ways:

- 1) Scaling-up enrollment of HIV-positive pregnant women, children, and male partners in care and treatment
- 2) Optimizing utilization of lay counselors, community health workers, PLHIV, and support groups to improve care
- 3) Improving monitoring and evaluation of PMTCT programs

PEPFAR will assist the MOH in strengthening access to, and quality of, HTC in ANC settings by implementing a national registration of all HTC providers and expanding structured supervision and quality control. USG will further support integrating EID into HTC services.

In blood safety, the technical priorities to be addressed include national policy and guidelines, strengthening of youth groups to recruit and retain adult donors, appropriate screening of blood and blood products, and implementation of effective monitoring measures. The 2010 independent review of the

HIV/AIDS national response identified a gap in support for adequate quality assured blood to reduce maternal deaths within government hospitals due to hemorrhage. PEPFAR will support these efforts by supporting the Malawi Blood Transfusion Service to: 1) the expansion of the pool of voluntary non remunerated blood donors so that Malawi can meet all of its demand through safe and reliable blood products and (2) developing a robust quality assurance system.

In behavior change, PEPFAR will support the GOM with interventions directed at: partner reduction; targeted condom social marketing in high-risk populations and for discordant couples; positive prevention and support for expansion of HTC especially couples counseling; timely initiation of ART particularly for pregnant women, and increasing access to male circumcision. A strong component of this strategic support is to continue building the capacity of indigenous organizations, both faith- and community-based, to take greater ownership of the HIV and AIDS response in Malawi.

The PFIP goal of reducing HIV transmission is being mitigated through increased national coverage for voluntary medical male circumcision (MC). Coordinated by the PEPFAR support to the MOH, PEPFAR implementing partners are expanding demand creation and MC services for 964,000 men in the next five years. PEPFAR will support training of MC providers, including procurement of equipment needed to conduct trainings, implementation of MC at sites including facility assessments and meetings with DHOs and ZHOs, and supervision of a new MC program including procurement of vehicles, support of supervisory staff, improved data management and reporting, and the development and provision of M&E tools.

In addition, Malawi will support a South-to-South approach with health staff attending MC Meetings regionally and internationally to learn about country experiences and disseminate Malawi's experiences more broadly. In order to achieve these gains in MC, activities will include provision of MC services through a network of private and public providers; innovative demand creation activities; linkages with HTC for counseling and referral; integration of MC referrals in MCH settings as part of male involvement, quality technical assistance and M&E. MC advocacy/communications will be integrated into all existing communication platforms (ie. radio, toolkits-Africa Transformation, Healthy Baby kit, Hope Kit, CAC, advocacy, etc.) as part of risk reduction strategies and to create demand as services become available.

Lastly in MC, PEPFAR will continue activities to develop strategic partnerships with the implementing partner for MC services for HIV prevention in Malawi including MC technical assistance activities to build capacity for social marketing of MC. This helps ensure that MC services in PPAs follow established best practice, development, production, and that private providers are included in the dissemination of evidence-based MC behavior change communications materials, including IEC materials and quality assurance activities, including development of protocols, QA checklists and other appropriate measures.

As a cross cutting education activity, PEPFAR will support the national association of HIV-positive teachers to use the Prevention with Positives Kit with their own support groups in each of the participating districts, to discuss positive living options. USG will fund the development of a weekly radio program specifically for teachers around increasing their own skills for HIV prevention as well as discussing how they might better address issues in the classroom. The program will also develop an integrated hotline for consumer information on all key HIV prevention issues: MCP, MC, PMTCT, discordancy.

As part of its integrated approach to prevention, in FY2011, PEPFAR will increase integration of services

through:

- 1) Expansion of screening and referrals for STIs and TB
- 2) Enhanced tracing activities to record TB treatment outcomes in TB/HIV co-infected clients
- 3) Support to increased blood safety activities under safe motherhood activities to improve maternal deaths caused by hemorrhage in district hospitals
- 4) Integration of primary and family centered care by distributing insecticide-treated nets and Waterguard for women and children; providing RH services including cervical cancer screening, family planning products procured by MOH (IUCD, Depo, pills, condoms) at HIV/TB integration sites

For Orphans and Vulnerable Children (OVC) and People Living with HIV (PLHIV), integrated HIV Effect Mitigation and Positive Action for Community Transformation will improve the wellbeing of 58,017 OVC and increase access to treatment and care for 41,505 PLHIV in nine districts of central and southern regions. Partners will implement four broad activities, including improving infant and young child feeding, protection of OVC from abuse and exploitation, and improving access to secondary school and productive assets.

Principal Partners: Baylor College of Medicine Children's Foundation Malawi (BCM-CFM), Banja La Mtsogolo (BLM), Christian Health Association of Malawi (CHAM), Dignitas International, Malawi Blood Transfusion Service (MBTS), Johns Hopkins University Center for Communication Programs (JHUCOM), Lighthouse, Lilongwe Medical Relief Trust Fund, Malawi AIDS Counseling Resource Organization (MACRO), Malawi Defense Force (MDF), Ministry of Health, Malawi, National AIDS Commission (NAC), Partners in Hope Trust, (PIH), Peace Corps, Population Services International (PSI), Project Concern International (PCI), University of Washington (ITECH)

2. Treatment, Care and Support:

Under the PFIP, PEPFAR will prioritize Care and Treatment support to Malawi through technical assistance in providing more efficacious, life-saving drug regimens. This will include meeting the expected four-fold expansion of treatment need due to changing WHO guidelines on treatment eligibility. A signature Care and Treatment intervention in Malawi is strengthened continuum of care efforts through a new pre-ART program to embolden the entire referral network and significantly reduce loss-to-follow-up (currently 79% of mother-infant pairs). Public-Private Partnerships will continue to be effectively utilized to scale-up the reach of limited PEPFAR and other public dollars in care activities.

Care and Treatment activities will include:

- 1) Increasing the use and quality of pre-ART management for People Living with HIV (PLHIV)
- 2) Strengthening laboratory support services for HIV diagnosis and management
- 3) Strengthening referrals and the continuum of care for PLHIV
- 4) Improving the capacity of the health care system to manage HIV and related diseases
- 5) Providing technical leadership within the MOH and MOGCCD
- 6) Enhancing zonal mentoring and capacity building

- 7) Scaling-up electronic health information systems
- 8) Supporting basic program evaluation
- 9) Providing directed support for pediatric HIV
- 10) Increasing support to military populations and families through the Malawi Defense Force
- 11) Expanding access to opioids
- 12) Strengthening sustainable food and nutrition programs
- 13) Expanding TB/HIV integrated services.

Under the PFIP, \$4,602,924 of PEPFAR funds are directed at OVC. PEPFAR resources will support the GOM to increase OVC access to essential care, support and protection services; improve the quality of OVC services; strengthen the capacity of local institutions to provide OVC and PLHIV services; improve the policy and legal environment for the protection of OVC and PLHIV; and, promote evidence-based strategic planning. Working through local NGOs and CBOs, PEPFAR will support the establishment of a system to assure continuation of existing OVC activities implemented by sub grantees. This support will include scholarships for OVC in secondary schools.

PEPFAR Partners will also launch extensive care services for 200 OVC including support to PLHIV as well as positive prevention activities. A model of “one-stop shopping” service providers will include: ART care; OI treatment; sexual and reproductive health care services including STI treatment and family planning services; mental health and psychosocial support; and as well as general medical care including malaria, TB and other illnesses.

Other support provided through this launch include: mentoring and roll-out of psychosocial services; promotion of income generating projects for girls; addressing gender in adolescent services including women’s rights and issues of violence against women, as well as male gender norms and gender roles; operational research regarding disclosure of HIV status to children and adolescents living with HIV. The later is an attempt to focus on the disclosure experience of adolescents, as well as capacity building, and sensitivities of health care workers and guardians around disclosure issues.

Support to major indigenous partners has been a major investment of PEPFAR Malawi. As a major partner agreement concludes, PEPFAR will ensure that there is no interruption in services for OVC beneficiaries of this partner-supported program. The sub-grantees who previously supported OVCs through payment of school fees, provision of school uniforms and materials as well as feeding programs, will be absorbed under other major PEPFAR OVC partners. The organizations will receive oversight and a small level of organizational capacity development, since the intense support received over the past five years has prepared these NGOs to function both organizationally and technically in the fight against HIV.

To determine the level of capacity and sustainability of these sub grantees, an external evaluation will be carried out in early 2011. A study will be undertaken to determine how many organizations are able to mobilize additional resources and provide leadership in their technical areas, as well identify gaps still existing within capacity building in Malawi and how USG may support the local response to HIV further.

With a focus on the young population in Malawi, PEPFAR will support:

- 1) Child Level: Improved quality of Early Childhood Development (ECD) and PSS (Psychosocial Support) programs that protect and promote children's cognitive, social, emotional, and physical development Orientation Children's Clubs (children); Materials for Children Corners
- 2) Parenting and Community Level: Parenting curriculum TOT training of key community resources persons (including CBCC caregivers); Community PSS awareness workshops; Community PSS skills workshops; PSS awareness workshops (parents/guardians) Orientation children's clubs (adult monitors)
- 3) District and Government Level: District level facilitator's training; Strengthened local, regional, national, and/or global policies, capacities, and resources ECD and PSS; District quality assurance monitoring; Joint supervisory visits will all be conducted.

Principal Care Partners: Baylor College of Medicine Children's Foundation Malawi (BCM-CFM), Academy for Educational Development(AED), African Palliative Care Association (APCA), Catholic Relief Services (CRS), CHAM, Dignitas International, Feed the Children, Howard University, Johns Hopkins University Center for Communication Programs (JHCOM), Lighthouse Trust, Malawi Defense Force (MDF), Ministry of Health, Malawi, PACT Malawi, Partners in Hope Trust, Peace Corps, Project Concern International, Save the Children (USA), University of Washington.

Principal Treatment Partners: Dignitas International, Howard University, Lighthouse Trust, Ministry of Health, Malawi, Partners in Hope Trust, University of Malawi - College of Medicine/Lab Consortium.

3. Woman and Girl-Centered Approaches:

Implementing a women, girls and gender equality approach is critical to sustaining the gains made in PEPFAR under GHI. GOM has prioritized mainstreaming of gender issues across all sectors; the GHI guidance provides assistance for USG implementers to ensure a focus on issues such as equitable access, empowerment and inclusion of women and girls, and engagement of men and boys. PEPFAR will prioritize Gender analysis in all USG project design, and a dissemination meeting with stakeholders on the GHI supplemental guidance on women, girls and gender equality principle will also take place.

In FY2011, PEPFAR will support scale-up of new WHO ART/PMTCT and infant feeding programs by GOM; expand women's access to income and productive resources by linking PMTCT services to the Title II Food for Peace program; advance the integration of HIV services with ANC and FP/RH services; strengthen GBV screening in HIV testing and counseling (HTC) sessions and client referrals to Victim Support Units and Post-exposure Prophylaxis (PEP) services at community and district level; address the lack of FP options for young women by increasing access to FP commodities and quality FP counseling through youth friendly HIV health services; prioritize changing harmful gender-based norms and practices in social and behavior change interventions; improve the quality and increase early uptake of ANC; strengthen referrals and linkages to ensure mother and infant pair follow-up; and reduce maternal and neonatal mortality through improvements to infrastructure and to quality of care.

4. Other Programs:

In addition to its support of the Global Fund, as a non-focus country, PEPFAR Malawi has leveraged its limited resources on strengthening the Malawi health care delivery systems as an effective tool to promote country ownership and sustainability of the HIV and AIDS response. Primary health systems

strengthening activities include the following:

- 1) Support to the GOM to increase the number of healthcare and social welfare workers through prioritizing human resources for health
- 2) Strengthening health financing through assessments and utilization of National Health Account data to program efficiently in a resource-constrained environment, and training of local technicians to have this capability
- 3) Providing integrated support for commodities and procurement. PEPFAR will partner with PMI, MCH and POP to refocus efforts on technical assistance to the MOH through the provision of two senior advisors to assist the Ministry to reform Central Medical Stores and strengthen drug management systems and accountability throughout the public sector supply chain. The benchmarking of MOH performance will ensure that US continued assistance in support of the supply chain in Malawi is performance-based and driven by objectively and mutually designed indicators (PEPFAR, PMI, POP, MCH)
- 4) Scaling-up Health Management Information Systems (HMIS) to provide real-time data for patient care, monitoring and evaluation and resource allocation
- 5) Enhancing lab services for the health care delivery system including HIV-related services
- 6) Integrating HIV prevention, care and treatment services with other health and development programs including FP, TB, food and nutrition, education and gender. Gender has been prioritized under the PFIP including the need to examine the gender imbalance at the level of local control of AIDS financing
- 7) Partnerships with the significantly larger Feed the Future program to support GOM nutrition policy, tools and service delivery

Linking with other stakeholders including the government, PEPFAR partners will support training to ensure that GBV screening is an integral part of the referral process including GBV screening during HTC and facilitating referrals to existing victim support services at the community level. This will include development of appropriate modules to be used in all such trainings. This is an opportunity to expand GBV and PEP awareness and knowledge amongst HIV counselors in Malawi and strengthen referrals for GBV cases to appropriate support services including PEP for victims of sexual assault.

A new flagship program under DOD will be launched to expand health service provision in the Malawi Defense Force (MDF) and increase coverage for the civilians they serve (70 percent of clients seen are civilians). Increased resources will scale up comprehensive health care services for maternal and child health and child survival (PMTCT, safe blood, nutrition support, malaria screening); Expansion of prevention with positive for HIV-positive men with limited options for care; Scale up of integrated TB and HIV services and including door-to-door HTC; Infrastructure support to ANC sites, MDF labs and for data management and expanding use of electronic data systems to better manage HIV and STI information.

Peace Corps will strategically place Response Volunteers (PCRVs) in District Assemblies and CBOs to enhance their capacity to effectively manage prevention, treatment and care services within the districts. Peace Corps Volunteers are human resources at the grass-roots level who will increase knowledge of disease transmission, prevention and treatment; promote behavior, social and organizational change;

build capacity of community members, health workers and grass-roots organizations; and strengthen linkages between communities, organizations and health facilities in support of PEPFAR and GHI goals.

In expanding strategic information knowledge, the National AIDS Commission (NAC) will conduct the next Behavioral Surveillance Survey (BSS) in FY2011. PEPFAR will provide technical assistance to the NAC and the National Statistics Office in the design and implementation of the BSS. PEPFAR will also support SABERS, the seroprevalence and behavioral survey in the MDF. The MSPA, a nationwide facility-based survey designed to collect information on the availability and quality of health services, including reproductive health, maternal and child health care, infectious diseases (malaria and TB) and HIV/AIDS services provided to Malawian men, women and children will be conducted. The survey will include all public, private and not-for-profit health facilities throughout the country except mobile or outreach service provision outlets.

Redacted

Public-Private Partnership(s)

Partnership	Related Mechanism	Private-Sector Partner(s)	PEPFAR USD Planned Funds	Private-Sector USD Planned Funds	PPP Description
Building the nursing workforce and nurse training capacity in Malawi	12119:GAIA/H RH/GHAI	Global AIDS Interfaith Alliance	400,000	400,000	PEPFAR Malawi is in a process of developing a PPP agreement with the Global faith Interfaith Alliance (GAIA), an NGO providing scholarships for nurses to go through Kamuzu College of Nursing, a constituent college of the University of Malawi for a four year nursing degree program. Each

					<p>funded scholar agrees to a four year bonding contract to work with the Ministry of Health in Malawi. GAIA will support 40 students over a period of 5 years. This activity will contribute significantly to the numbers of nurses that Malawi will produce and retain by the end of the five year Partnership Framework. The program will also support 4 Masters students in nursing and these will contribute to improving the faculty of the nursing college.</p>
Capacity Building Initiative Pilot		Standard Bank	0	0	<p>Standard Bank Group Limited, of which Standard Bank is a subsidiary, is currently the largest African Banking group in terms of assets, geographic spread and market</p>

				<p>capitalization. The group operates in 18 African countries and over 21 countries globally. The group is committed to making a real difference in Southern Africa by being relevant to the societies in which it operates. In this partnership with USAID/Malawi, Standard Bank Malawi has committed to support and strengthen the Local Assembly finance management systems through capacity building in finance management and reporting as one way of contributing to the development of Malawi. Large amounts of HIV/AIDS funds are channeled through Local Assemblies yearly and the capacity of these Local Assemblies to</p>
--	--	--	--	---

				<p>timely manage and absorb these funds is crucial for the progress of the HIV/AIDS response in Malawi. Standard Bank will place experienced finance management consultants in 4 pilot sites for a period of 6 months to transfer skills.</p> <p>USAID/Malawi through PEPFAR will not match funds in this initiative, but will utilize its experience in development work to provide technical support.</p>
<p>Capacity support for Early Childhood Development & Psychosocial Support (C-SEP)</p>	<p>12120:C-SEP</p>			<p>C-SEP is a three year co-ag implemented by Save the Children. Its goal is to help OVC realize their full potential by strengthening participation in quality early childhood development (ECD) and psychosocial support (PSS). C-SEP will accomplish</p>

				<p>this goal by increasing access to and quality of ECD and PSS programs; improving household and community capacity to promote ECD and PSS; and strengthening policies and capacities in ECD and PSS. These activities support the “Impact Mitigation” goal of the Malawi Partnership Framework. C-SEP is being implemented in 3 districts (Blantyre, Chiradzulu and Zomba), and works with the Ministries of Gender, Children and Community Development (MoGCCD), Health, and Education at the district level. In addition to the ministries, C-SEP works with the ECD network and community structures to ensure government-led</p>
--	--	--	--	--

					collaboration and networking to identify opportunities for leveraging community resources to support the delivery of ECD and PSS.
Extending quality improvement for HIV/AIDS in Malawi	12107:EQUIP	Partners in Hope	2,438,000	2,438,000	The Project capitalizes on existing networks, infrastructure and acquired expertise and skills of partners and will achieve the goal through three complementary objectives: Strengthening the continuum of care between different health services and between facilities and communities. Working with CHAM and government clinics, the project will develop a model for care that involves integration of services within the same clinic or strong linkages among different clinics when

					<p>integration is not possible; Developing Zonal mentoring teams- Individuals in CHAM hospitals will be trained in clinical and program management to ultimately serve as mentors at other sites in their regions; Creating a consortium of sites for operational research to inform the other 2 objectives and improve the quality of HIV care and training - This will involve operational research to address critical questions of priority to inform the national ART program.</p>
<p>Increased production capacity for ready-to-use foods in Malawi</p>		<p>Project Peanut Butter</p>	0	0	<p>USAID Malawi embarked on a new partnership with Project Peanut Butter in December 2008, a locally-based company that produces Ready to Use Therapeutic Food (RUTF) called</p>

				<p>plumpy nut. The GDA grant supports an alliance between Project Peanut Butter, Nutriset, Hickey Family Foundation and Arnow. The funding was used to purchase larger-scale machinery that will increase the rate of production from roughly 500 tons/year to 1200 tons/year, and to purchase a foil-seal sachet packaging machine with nitrogen. Plumpy-nut, locally known as chiponde, is used to treat severe acute malnutrition in children. It is a mixture of peanut butter, oil, sugar, milk powder and vitamins and minerals in a precooked paste. The GDA supports research into new and/or improved recipes for treating severe and moderate acute</p>
--	--	--	--	---

					malnutrition in children and adults who are HIV-positive.
Integrated (HIV Effect) Mitigation and Positive Action for Community Transformation (IMPACT)	14249: Integrated (HIV effect) Mitigation and Positive Action for Community Transformation (IMPACT)	Clinton Health Access Initiative			The Integrated HIV Effect Mitigation and Positive Action for Community Transformation (IMPACT) project is expected to improve the wellbeing of 58,017 OVC and 41,505 people living with HIV (PLHIV) in nine districts in central and southern Malawi. Catholic Relief Services brings private sector, information technology and faith-based partners to the Title II-supported Wellness and Agriculture for Life Advancement (WALA) consortium. This alliance mobilizes expertise, cash and in-kind resources to expand access to care and treatment services OVC and PLHIV. IMPACT's implements through

				<p>existing structures thus enhancing sustainability, country ownership, and active participation of beneficiaries. GOM's heavy involvement in the program at all levels has provided an optimal environment for implementation and coordination of services with various departments and other programs.</p>
<p>Malawi Tiwalere Orphans and Vulnerable Children (OVC) Project</p>	<p>12126:Feed/OVC/GHAI</p>			<p>Tiwalere is a five year project that takes a comprehensive approach to food security, nutrition education, income generation, and water and sanitation improvement. Tiwalere's goal is to ensure improved well-being of OVCs in 15 districts, targeting 73,051 children and 39,261 households. This goal will be achieved through three strategic</p>

					<p>objectives which support the impact mitigation goal of the PFIP. The first objective is to improve the health and nutrition status of children aged 0-59 months. This is done through activities for children attending community-based child care centers and through nutrition education to parents and caregivers. The second objective is sustainable improvements to food security by promoting new farming methods and improved crop varieties. The third objective is to enhance the capacity of households caring for OVC.</p>
Male Circumcision	12118:BLM CIRC GHAI	Banja La Mtsogolo	1,750,000	1,750,000	Banja La Mtsogolo (BLM) is a national family planning (FP) and sexual and reproductive health

				<p>(SRH) organization with static clinics in 22 of 28 districts in all three regions of Malawi. Under the Partnership Framework (PF) negotiated between PEPFAR and the Government of Malawi (GOM), BLM will target uncircumcised boys and HIV negative men between the ages of 10 and 29. BLM is committed to increased access to safe, voluntary male circumcision (MC) for 52,000 people; increased engagement of men in pursuing sexual and reproductive health for themselves and their partners, with an emphasis on HIV prevention and integration of MC service provision into ANC, PMTCT, and neonatal care programs in collaboration with MOH. BLM will train</p>
--	--	--	--	--

					100 private and MOH providers to provide a minimum package of MC in BLM and MOH facilities. BLM's experience implementing MC programs for HIV prevention in Malawi, and experience gained from similar programs across the MSI Global Partnership, will allow it to feed into policy dialogue and support the creation of the GOM MC policy.
NEPI - Building the nursing workforce and nurse training capacity in Malawi		Columbia University, Clinton Health Access Initiative , ELMA Foundation, IntraHealth/CapacityPlus	1,500,000	0	To support innovative strategies and promising practices that will inform curricula development, faculty preparation and strategies for faculty retention, and educational models that prepare new nurses to practice in the diversity of medical and community settings where

					health needs are greatest.
OVC (Education & Sustainable Economic Growth wrap arounds)	12129:TBD/LM /GDA	TBD	Redacted	Redacted	This proposed project will be a new public-private partnership to strengthen care for orphans and vulnerable children in HIV-affected communities in Malawi. The project is expected to be innovative and pilot new strategies and/or scale up tested strategies that show promise in addressing strengthening family and community capacity to care, support and protect vulnerable children, as well as improve their access to essential services. One or multiple awards may be made depending on the applications that come in under the APS. Potential partnerships will be in line with the Malawi HIV and AIDS National

					Action Framework and the Malawi National Plan of Action for Orphans and Vulnerable Children and focused on expanding implementation of a comprehensive package of high quality interventions for orphans and vulnerable children
PEPFAR OVC Initiative		New Partner	Redacted	Redacted	67000 OVC and 33,000 PLHIV will receive support through a third application that seeks to wrap PEPFAR activities around Title II Food for Peace activities. Key activities will include improved infant feeding and young child feeding, integrated community management of childhood illnesses, improved child and legal protection services, education support and income generating activities including village

					<p>savings and loans schemes. The application will also support the efforts of the GOM to develop and implement a national pre-ART program for PLHIV.</p> <p>This five year application will provide targeted supplemental nutrition and water purification commodities to OVC in CBCCs, as well as strengthen community and household food security through improved agricultural practices, farm inputs, and income generating activities. A total of 27644 OVC will be reached in nine districts.</p>
Safeguard the Household	12106:LMRTF/ PMTCT/GHAI	Lilongwe Medical Relief Trust Fund	1,100,000	1,100,000	The "Safeguard the Household" (STH) project aims to improve the quality and impact of current PMTCT service delivery

				<p>systems, increase linkages with ART and other maternal child health and family planning services, and explore new technologies and approaches make PMTCT services more effective and feasible. The project will target HIV-infected pregnant women, their partners, and HIV-exposed infants and children under five. In doing so, the project will safeguard the entire household. The overall goal is to empower and support the MOH in its efforts to implement a comprehensive HIV prevention, treatment and care program in Malawi in the areas identified by the Partnership Framework (of the GoM and USG) and the NAF. The STH</p>
--	--	--	--	--

					<p>project will be implemented by a partnership of 12 organizations, all with substantial experience working in Malawi, and will be led by an indigenous organization, Lilongwe Medical Relief Trust Fund (aka Lilongwe Trust) and supported by their main technical partners UNC Project, the University of North Carolina and EGPAF.</p>
<p>Support for Health Systems Strengthening and HIV/AIDS service delivery in Malawi's South -East Zone</p>	<p>12105:Dignitas /QCT/GHAI</p>	<p>Dignitas International</p>	<p>1,617,968</p>	<p>1,617,968</p>	<p>The ultimate goal of the program is to achieve the highest attainable standard of health and wellbeing in Malawi. The program will build sustainable, locally owned capacity and increased local autonomy. In order to avoid dependency, the program is carried out with and through the South-East</p>

				<p>Zonal Health Office (ZHO) and the District Health Offices (DHOs) of the zone, and emphasizes targeted knowledge-exchange. The program comprises of three clusters of implementation activities:</p> <p>Management of the HIV/AIDS referral clinic at Zomba Central Hospital, which serves as a pilot site for several initiatives aimed at improving patient care and bolstering human resources for health; Training and mentorship of service providers (i.e., Clinical Officers, Medical Assistants, Nurses, midwives, and counselors), and health system managers and supervisors (i.e., ZHO, DHO, DHMT, EHOs, and District ART, HTC, PMTCT, and HBC</p>
--	--	--	--	---

					Coordinators); and Design and implementation support of tools for patient management, clinic management, and health systems management.
Support to ten Malawi Bureau of Standards laboratory		Pfizer	0	0	USG Malawi continues to benefit from the global partnership with Pfizer, a U.S. drug company that provided technical expertise to USAID/Malawi in the development of business plans for several HPN and SEG partners in 2008. Although the TA ended his assignment in early May 2008, he has maintained a close relationship with the mission and in July 2008 managed to mobilize a high performance liquid chromatography machine to the Malawi Bureau of Standards (MBS) which was handed

					<p>over to the MBS by the US Ambassador to Malawi by a representative of Pfizer in 2009. The MBS had been trying to source equipment for a long time. Through his continued efforts and interest in Malawi, the TA has managed to secure additional equipment for the MBS, from Pfizer. The significance of this donation is that it will help the MBS reach International Organization for Standardization (ISO) certification. Pfizer is also looking into the possibility of organizing a fellow to assist the MBS with the set-up, operation and maintenance of the new equipment. The estimated total value of the equipment and TA support is not yet available.</p>
The Malawi Teacher		New Partner	Redacted	Redacted	The Malawi Teacher

<p>Professional Development Support (MTPDS) activity,</p>				<p>Professional Support activity will provide technical assistance and support to Ministry of Education, Science and Technology (MOEST) in implementing teacher education support and systems management, with an emphasis on completing and reinforcing its introduction of the Primary Curriculum and Assessment Reform (PCAR). Targeting teachers, school administrators, young people and children nationwide, this Teacher Professional Development Support activity will support linkages and complement key MOEST and GOM priority initiatives and plans in teacher education and professional</p>

					development, including the HIV/AIDS and Education Strategy and Plan.
Tingathe program	12130:Baylor/QCT/GHAI	Baylor University, College of Medicine	1,100,227	1,100,227	The goal of this project is to expand the scope and reach of the Tingathe program resulting in a majority of mothers and infants at participating facilities receiving the full complement of PMTCT and early Infant Diagnosis (EID) services, and prompt entry of infected infants and mothers into care for optimal treatment outcomes. Despite extensive evidence on improved PMTCT regimens, post-exposure prophylaxis, and rapid clinical progression in HIV-infected infants, there has been scant progress made on how best to coordinate and ensure delivery of

					the multiple services that HIV-positive mothers and their infants require in the real-world setting. In the Lilongwe area, the BCM-CFM Tingathe outreach program has made strides in developing systems to improve the quality and utilization of PMTCT, EID, and pediatric HIV care services.
Together for Girls		New Partner	840,000	0	UNICEF Malawi with USG and CHAI will support the government of Malawi to undertake, for the first time, a nationally representative population based survey of sexual, physical and psychological violence against children and young women between the ages of 13 to 24, including those living with and affected by HIV and AIDS. The key

				<p>purpose of the survey is to determine the prevalence of violence against children and young women and to develop a better understanding of protective and risk factors. This will contribute to informed policy decisions and sound programming, to effectively prevent and respond to violence against children and young women in Malawi. This project is in response to concerns regarding violence against children in Malawi and the need for quality data that is nationally representative. The implementation of the project will be guided by lessons learned during the successful implementation of similar surveys on violence against</p>
