

**PEPFAR/UNAIDS MALAWI SID 3.0  
SUSTAINABILITY PROFILE  
7<sup>th</sup> November, 2017**

**Country Overview:** Malawi has a strong national HIV/AIDS response and continues making progress toward epidemic control. The recent Malawi Population-Based HIV Impact Assessment (MPHIA) showed significant progress toward the globally endorsed targets of 90-90-90. Prevalence among 15-49 year-olds declined from a peak of 16.7% in 1999 to roughly 10.0% in 2016 (MPHIA 2016). Since early in the epidemic, annual HIV incidence has declined to an estimated 38,000 per year in 2016 (Corrected Spectrum, 2016). As of June 2017, Malawi had 1,054,000 people living with HIV (PLHIV)(Corrected Spectrum, 2016), and 69% (714,891) PLHIV on anti-retroviral treatment (ART)(MOH Quarterly Report April-June 2017). Malawi's HIV response is grounded in a public health approach that is low cost and largely facility-based. Although the Government of Malawi (GoM) leads and oversees the national response, the HIV sector is heavily dependent on donor support, receiving 86% of its funding from PEPFAR and the Global Fund to Fight AIDS, TB and Malaria ("Global Fund"), and a further 12% from other donor resources.

**SID 3.0 Planning Process:** In early October 2017, UNAIDS and PEPFAR created a planning team of representatives from PEPFAR, UNAIDS, civil society, National AIDS Commission (NAC) and the MOH. The SID 3.0 planning team met on October 19, 2017 to review the SID tool and guidance, develop the participant list, and discuss facilitation roles, responsibilities, and meeting logistics. Invitations were sent by PEPFAR and UNAIDS to stakeholders listed in the SID guidance document.

**Stakeholder Consultative Meeting:** The Malawi SID 3.0 Stakeholder Consultation Meeting was held on November 7, 2017 in Lilongwe. The meeting was jointly-hosted by UNAIDS and PEPFAR. The UNAIDS Country Director (Thérèse Poirier) gave opening remarks along with the PEPFAR Country Coordinator (Emily Hughes). The four domain working groups were each co-facilitated by a PEPFAR and UNAIDS representative. The event included representation from a cross-section of stakeholders, including GoM, civil society, private sector representatives, and donors.

**Sustainability Strengths:** The three highest scoring elements for the SID 3.0 are Planning and Coordination, Human Resources for Health, and Performance Data. The participants identified the following areas as sustainability strengths: Malawi has a National Strategic Plan for HIV/AIDS 2015-2020 (NSP), which informs PEPFAR and Global Fund investments, and has adopted the 90-90-90 framework. Current national HIV/AIDS technical practices follow WHO guidelines for initiation of ART, i.e. Test and Start, for all populations. The active engagement of stakeholders (CSO, Private Health Sector, Business and Corporate Sector, External Agencies – Donors and Multilateral Organizations etc.) in the national

strategy development is also a strength. A high score for Human Resources for Health is attributed to a large number of effective community-based health worker (HCW) cadres supported by donors supporting HIV services. These lay HCWs include facility-based HIV Diagnostic Assistants, mentor mothers, expert clients, and community cadres who support HIV prevention, testing, linkage, and retention services beyond the facility. Malawi scored well on Performance Data due to timely availability of HIV clinical data through a harmonized national M&E system; frequency of surveys and surveillance; and the ability of the government to collect expenditure data effectively using the following processes and assessments, namely: Global AIDS Monitoring (GAM), National AIDS Spending Assessment (NASA), National Health Accounts (NHA), etc.

**Sustainability Weaknesses:** The SID 3.0 scored low on Domestic Resource Mobilization, Private Sector Engagement, and Commodity Supply. The overall state of economic progress contributed to a low score for Domestic Resource Mobilization. As the Malawi HIV/AIDS national response is heavily donor dependent (at the moment less than 15% of the total expenditure is from domestic sources), the country should develop a health financing strategy, similar to that of Zimbabwe along with a domestic resource mobilization strategy. Advocacy for increased government commitment to funding the national HIV/AIDS response is ongoing. Private Sector Engagement also scored low because there is no established or harmonized platform for it (e.g. social corporate response engagement is ad hoc and not tailored to needs; oversight of private sector providers involves multiple regulatory authorities). That said, groups in the private and non-profit sectors have strengthened their HIV/AIDS work place programs.

Commodity Supply scored low because Malawi uses few domestic resources for purchase of HIV related commodities, and the country does not yet have a single, harmonized plan for supply chain management. Due to past challenges with accountability, donor-funded parallel supply chains predominate for HIV, TB and malaria. The supply chain for HIV and TB is functional, and commodities are available over 90% of the time. The GoM, in collaboration with donors, has conducted a supply chain assessment of the Central Medical Stores and is implementing a roadmap to integrate these discrete, donor-funded supply chains under the country's Central Medical Stores Trust. However, participants recommended that Malawi conduct a broader assessment of the entire national supply chain. Weak commodity management information systems were also identified as an impediment to sustainability.

The SID 3.0 Policies and Governance element scored lower (6.12 yellow) than in the SID 2.0 (8.64 dark green). Although national policies are generally progressive, legal frameworks are weak and do not facilitate access to services for key populations (KPs). Efforts are in place to educate KPs about legal rights under the national response. While the MOH has a policy on patients' rights, the policy does not explicitly refer to PLHIV. Moreover, although the NSP includes content on key populations programming, the strategy needs more clarity and focus on policies and programs for KPs. Another gap includes impact mitigation for

vulnerable children. Current efforts by different ministries including Health, Education, and Social Welfare are not well coordinated. The GoM's near-final National Strategy for Adolescent Girls and Young Women aims to improve coordination among these ministries to ensure more effective and targeted prevention and impact mitigation efforts by both GoM and donor partners.

### SID 3.0 Representation

| Name                          | Organization/ Agency       | Position   |

### GNI Per Capita (Atlas Method)

### Population Pyramid (2017)

## Domain A. Governance, Leadership, and Accountability

**What Success Looks Like:** Host government upholds a transparent and accountable resolve to be responsible to its citizens and international stakeholders for achieving planned HIV/AIDS results, is a good steward of HIV/AIDS finances, widely disseminates program progress and results, provides accurate information and education on HIV/AIDS, and supports mechanisms for eliciting feedback. Relevant government entities take actions to create an enabling policy and legal environment, ensure good stewardship of HIV/AIDS resources, create space for and promote participation of the private sector, and provide technical and political leadership to coordinate an effective national HIV/AIDS response.

| 1. <b>Planning and Coordination:</b> Host country develops, implements, and oversees a costed multiyear national strategy and serves as the preeminent architect and convener of a coordinated HIV/AIDS response in the country across all levels of government and key stakeholders, civil society and the private sector. | Data Source  | Notes/Comments   |
|---|--|--|
| <p><b>1.1 Content of National Strategy:</b> Does the country have a multi-year, costed national strategy to respond to HIV?</p>   | <p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. There is a multiyear national strategy. Check all that apply:</p> <p><input checked="" type="checkbox"/> It is costed</p> <p><input checked="" type="checkbox"/> It has measurable targets.</p> <p><input checked="" type="checkbox"/> It is updated at least every five years</p> <p>Strategy includes all crucial response components for prevention and treatment (HIV testing, treatment and care [including children and adolescents], PMTCT, transition from 'catchup' to sustainable VMMC if country performs VMCMs, scale-up of viral load, EID, and other key metrics)</p> <p><input type="checkbox"/> Strategy includes explicit plans and activities to address the needs of key populations.</p> <p><input checked="" type="checkbox"/> Strategy includes all crucial response components to mitigate the impact of HIV on vulnerable children</p> <p><input checked="" type="checkbox"/> Strategy (or separate document) includes considerations and activities related to sustainability</p> | <p>1.1 Score: 2.29</p> <p>National HIV/AIDS Strategic Plan (2015-2020); National Viral Load scale up plan; PMTCT strategy, VMMC, Condom strategy, AGYW strategy is being finalised; Prevention strategy exists but is under review; National communication strategy is being finalised; Abstinence strategy. For sustainability there are stakeholder documents e.g, MOH and PEPFAR and the HIV Bill consolidates the sustainability aspects</p> <p>The NSP is due for review and planning is underway for review and revision. The timeline is 2015- 2020. The NSP informs Global Fund investments and addresses complementary funding however there is need to review how we are performing for the subcomponents- especially prevention. There are other strategies that are being developed e.g. condom strategy, prevention strategy, but they are not as robust in terms of measurements. Although the NSP include KP programming but it is not explicit, although it is being developed. The national prevention response was reviewed and gaps have been identified. The response components include vulnerable children however the impact mitigation section needs to be developed further</p> |
| <p><b>1.2 Participation in National Strategy Development:</b> Who actively participates in development of the country's national HIV/AIDS strategy?</p>   | <p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. The national strategy is developed with participation from the following stakeholders (check all that apply):</p> <p><input checked="" type="checkbox"/> Its development was led by the host country government</p> <p><input checked="" type="checkbox"/> Civil society actively participated in the development of the strategy</p> <p><input checked="" type="checkbox"/> Private health sector providers, facilities, and training institutions, actively participated in the development of the strategy</p> <p><input checked="" type="checkbox"/> Businesses and the corporate sector actively participated in the development of the strategy including workplace development and corporate social responsibility (CSR)</p> <p><input checked="" type="checkbox"/> External agencies (i.e. donors, other multilateral orgs., etc.) supporting HIV services in-country participated in the development of the strategy</p>  | <p>1.2 Score: 2.50</p> <p>National HIV/AIDS Strategic Plan (2015-2020); NSP development report and the national partnership forum meeting minutes</p> <p>The information about participation should be available in the NSP. CHAM and MBCA participated. The national partnership forum represents all constituencies.</p>   |

|   |   |                                   |  |  |
|---|---|-----------------------------------|--|--|
| <p><b>1.3 Coordination of National HIV Implementation:</b> To what extent does the host country government coordinate all HIV/AIDS activities implemented in the country, including those funded or implemented by CSOs, private sector, and donor implementing partners?</p> | <p>Check all that apply:</p> <p><input type="checkbox"/> There is an effective mechanism within the host country government for internally coordinating HIV/AIDS activities implemented by various government ministries, institutions, offices, etc.</p> <p><input checked="" type="checkbox"/> The host country government routinely tracks and maps HIV/AIDS activities of:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> civil society organizations</li> <li><input type="checkbox"/> private sector (including health care providers and/or other private sector partners)</li> <li><input checked="" type="checkbox"/> donors</li> </ul> <p>The host country government leads a mechanism or process (i.e. committee, working group, etc.) that routinely convenes key internal and external stakeholders and implementers of the national response for planning and coordination purposes.</p> <p><input type="checkbox"/> Joint operational plans are developed that include key activities of implementing organizations.</p> <p><input type="checkbox"/> Duplications and gaps among various government, CSO, private sector, and donor activities are systematically identified and addressed.</p> | <p>1.3 Score: 1.33</p>            | <p>JAR reports; NAC LAHF quarterly report; MPF</p>           | <p>NAC undertakes resource mapping. With CHAI support mapping is conducted biannually. There is need to strengthen corporate engagement during implementation. Planning is not conducted jointly. At district level the DIP should include all stakeholder investments. At national level planning used to happen but has not continued.</p> |
| <p><b>1.4 Sub-national Unit Accountability:</b> Is there a mechanism by which sub-national units are accountable to national HIV/AIDS goals or targets? (note: equal points for either checkbox under option B)</p>   | <p><input type="radio"/> A. There is no formal link between the national plan and sub-national service delivery.</p> <p><input checked="" type="radio"/> B. There is a formal link between the national plan and sub-national service delivery. (Check the ONE that applies.)</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Sub-national units have performance targets that contribute to aggregate national goals or targets.</li> <li><input type="checkbox"/> The central government is responsible for service delivery at the sub-national level.</li> </ul>   | <p>1.4 Score: 2.50</p>            | <p>LAHAF, DIPs, district targets are sent by MOH, PEPFAR</p> |  |
| <p align="center"><b>Planning and Coordination Score:</b></p>   |   | <p align="center"><b>8.62</b></p> |  |  |

| <b>2. Policies and Governance:</b> Host country develops, implements, and oversees a wide range of policies, laws, and regulations that will achieve coverage of high impact interventions, ensure social and legal protection and equity for those accessing HIV/AIDS services, eliminate stigma and discrimination, and sustain epidemic control within the national HIV/AIDS response. |  | <b>Data Source</b> | <b>Notes/Comments</b>  |
|---|--|--------------------|--|
| <b>2.1 WHO Guidelines for ART Initiation:</b> Does current national HIV/AIDS technical practice follow current WHO guidelines for initiation of ART, i.e. Test and START for all populations?   | <p>For each category below, check yes or no to indicate if current national HIV/AIDS technical practice follows current WHO guidelines for each of the following:</p> <p>A. Adults (&gt;19 years)</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>B. Pregnant and Breastfeeding Mothers</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>C. Adolescents (10-19 years)</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>D. Children (&lt;10 years)</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> | 2.1 Score: 1.11    | National guideline for the clinical management of HIV (ART/PMTCT) 2016 edition |

The programs and policies need to improve as they are not explicit and may be outdated. Programs for prisons are small scale and need to be standardized and incorporated in national policies. Weak implementation of policies for domestic violence and children</p> |

**2.6 Structural Obstacles:** Does the country have laws and/or policies that present barriers to delivery of HIV prevention, testing and treatment services or the accessibility of these services?

**For each question, select the most appropriate option:**

Are transgender people criminalized and/or prosecuted in the country?

- Both criminalized and prosecuted
- Criminalized
- Prosecuted
- Neither criminalized nor prosecuted

Is cross-dressing criminalized in the country?

- Yes
- Yes, only in parts of the country
- Yes, only under certain circumstances
- No

Is sex work criminalized in your country?

- Selling and buying sexual services is criminalized
- Selling sexual services is criminalized
- Buying sexual services is criminalized
- Partial criminalization of sex work
- Other punitive regulation of sex work
- Sex work is not subject to punitive regulations or is not criminalized.
- Issue is determined/differs at subnational level

2.6 Score:

0.58

Note: This question is adapted from questions asked in the revised UNAIDS NCPI (2016). If your country has completed the new NCPI, you may use it as a data source to answer this question. Legal and Policy environmental index; stigma index

The HIV Bill includes criminalisation but is being debated. The Public Health act does include criminalization for knowingly transmitting any disease

Does the country have laws criminalizing same-sex sexual acts?

- Yes, death penalty
- Yes, imprisonment (14 years - life)
- Yes, imprisonment (up to 14 years)
- No penalty specified
- No specific legislation
- Laws penalizing same-sex sexual acts have been decriminalized or never existed

Does the country maintain the death penalty in law for people convicted of drug-related offenses?

- Yes, with high application (sentencing of people convicted of drug offenses to death and/or carrying out executions are a routine and mainstreamed part of the criminal justice system)
- Yes, with low application (executions for drug offenses may have been carried out in recent years, but in practice such penalties are relatively rare)
- Yes, with symbolic application (the death penalty for drug offenses is included in legislation, but executions are not carried out)
- No

Does the country have laws criminalizing the transmission of, non-disclosure of, or exposure to HIV transmission?

- Yes
- No, but prosecutions exist based on general criminal laws
- No

Does the country have policies restricting the entry, stay, and residence of people living with HIV (PLHIV)?

- Yes
- No

| 5. Public Access to Information: Host government widely disseminates timely and reliable information on the implementation of HIV/AIDS policies and programs, including goals, progress and challenges towards achieving HIV/AIDS targets, as well as fiscal information (public revenues, budgets, expenditures, large contract awards , etc.) related to HIV/AIDS. Program and audit reports are published publically. Efforts are made to ensure public has access to data through print distribution, websites, radio or other methods of disseminating information. |  |                 |   |

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN A

## Domain B. National Health System and Service Delivery

**What Success Looks Like:** Host country institutions (inclusive of government, NGOs, civil society, and the private sector), the domestic workforce, and local health systems constitute the primary vehicles through which HIV/AIDS programs and services are managed and delivered. Optimally, national, sub-national and local governments have achieved high and appropriate coverage of a range of quality, life-saving prevention, treatment, and care services and interventions. There is a high demand for HIV/AIDS services, which are accessible and affordable to poor and vulnerable populations at risk of infection (i.e. key populations, discordant couples, exposed infants), are infected and/or are affected by the HIV/AIDS epidemic.

| <b>6. Service Delivery:</b> The host country government at national, sub-national and facility levels facilitates planning and management of, access to and linkages between facility- and community-based HIV services.   | <b>Data Source</b> | <b>Notes/Comments</b>   |
|--|--------------------|---|
| <p><b>6.1 Responsiveness of facility-based services to demand for HIV services:</b> Do public facilities respond to and generate demand for HIV services to meet local needs? (Check all that apply.)</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Public facilities are able to tailor services to accommodate demand (e.g., modify or add hours/days of operations; add/second additional staff during periods of high patient influx; customize scope of HIV services offered; adapt organization/model of service deliver to patient flow)</li> <li><input checked="" type="checkbox"/> Public facilities are able to situate services in proximity to high-HIV burden locations or populations (e.g., mobile clinics)</li> <li><input checked="" type="checkbox"/> There is evidence that public facilities in high burden areas and/or serving high-burden populations generate demand for HIV services</li> </ul>   | 6.1 Score: 1.11    | <p>Baylor, Lighthouse, MSH, data on weekend testing. Q2 2017 HIV quarterly supervision report.</p> <p>ONLY IN PARTNER SUPPORTED SITES. DHA to provide information on the number of facilities supported by partners, 85% demand creation happening in public facilities</p> |
| <p><b>6.2 Responsiveness of community-based HIV/AIDS services:</b> Has the host country standardized the design and implementation of community-based HIV services? (Check all that apply.)</p> <p>The host country has standardized the following design and implementation components of community-based HIV/AIDS services through (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Formalized mechanisms of participation by communities, high-burden populations and/or civil society engagement in delivery or oversight of services</li> <li><input checked="" type="checkbox"/> National guidelines detailing how to operationalize HIV/AIDS services in communities</li> <li><input checked="" type="checkbox"/> Providing official recognition to skilled human resources (e.g. community health workers) working and delivering HIV services in communities</li> <li><input checked="" type="checkbox"/> Providing financial support for community-based services</li> <li><input checked="" type="checkbox"/> Providing supply chain support for community-based services</li> <li><input checked="" type="checkbox"/> Supporting linkages between facility- and community-based services through formalized bidirectional referral services (e.g., use of national reporting systems to refer and monitor referrals for completeness)</li> </ul> | 6.2 Score: 1.11    | <p>Community Health strategy 2016. THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN B

## Domain C. Strategic Investments, Efficiency, and Sustainable Financing

**What Success Looks Like:** Host country government is aware of the financial resources required to effectively and efficiently meet its national HIV/AIDS prevention, care and treatment targets. HCG actively seeks, solicits and or generates the necessary financial resources, ensures sufficient resource commitments, and uses data to strategically allocate funding and maximize investments.

| Fiscal Context for Health and HIV/AIDS  |        |  | Data Source  | Notes/Comments   |
|---|--------|--|--|--|
| This section will not be assigned a score, but will provide additional contextual information to complement the questions in Domain                       |        |  |  |  |
| 1. What percentage of general government expenditures goes to health?   | 10%    |  | National Health Accounts. Avg 2012 to 2015 (last data point 11%) | Need to see if we can get more recent data point using the Fiscal Budget.<br>National Health accounts would be ideal can provide both budget as well as expenditure. Recommend |
| 2. What is the per capita health expenditure all sources?   | \$40   |  | National Health Accounts. Avg 2012 to 2015 (last data point 11%) | Average for 2012-2015<br>2012 – 43.5 USD<br>2014-2015 – 39.2 USD   |
| 3. What is the total health care expenditure all sources as a percent of GDP?   | 11.30% |  | National Health Accounts. Avg 2012 to 2015 (last data point 11%) |  |
| 4. What percent of total health expenditures is financed by external resources?   | 61.60% |  | National Health Accounts. Avg 2012 to 2015 (last data point 11%) |  |
| 5. What percent of total health expenditures is financed by out of pocket spending net of household contributions to medical schemes/pre-payment schemes? | 8.50%  |  | National Health Accounts. Avg 2012 to 2015 (last data point 11%) |  |

| <b>11. Domestic Resource Mobilization:</b> The partner country budgets for its HIV/AIDS response and makes adequate resource commitments and expenditures to achieve national HIV/AIDS goals for epidemic control in line with its financial ability.  | Data Source   | Notes/Comments   |
|--|---|--|
| <p>Check all that apply:</p> <p><input type="checkbox"/> A. Yes, there is a universal, comprehensive financing scheme that integrates social health insurance, public subsidies, and national budget provisions for public health aspects (e.g., disease surveillance). It includes the following (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> ARVs are covered</li> <li><input type="checkbox"/> Non-ARV care and treatment is covered</li> <li><input type="checkbox"/> Prevention services are covered</li> </ul> <p><input type="checkbox"/> B. Yes, there is an affordable health insurance scheme available (check one of the following).</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> It covers 25% or less of the population.</li> <li><input type="checkbox"/> It covers 26 to 50% of the population.</li> <li><input type="checkbox"/> It covers 51 to 75% of the population.</li> <li><input type="checkbox"/> It covers more than 75% of the population.</li> </ul> <p><input type="checkbox"/> C. The affordable health insurance scheme in (B.) includes the following (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> ARVs are covered.</li> <li><input type="checkbox"/> Non-ARV care and treatment services are covered.</li> <li><input type="checkbox"/> Prevention services are covered.</li> <li><input type="checkbox"/> It includes public subsidies for the affordability of care.</li> </ul> <p><b>11.1 Long-term Financing Strategy for HIV/AIDS:</b><br/>Has the host country government developed a long-term financing strategy for HIV/AIDS?</p> | <p>11.1 Score: 0.00</p> <p>The financing plan exists until 2020</p> | <p>The plan exists for 2020 however as per the NHSP - resources remain unpredictable<br/>B - there is no affordable health insurance scheme and the pvt insurance does not cover 25% of the population</p> |

|  |   |                         |  |   |
|--|---|-------------------------|--|---|
| <p><b>11.2 Domestic Budget:</b> To what extent does the national budget explicitly account for the national HIV/AIDS response?</p>   | <p><input type="radio"/> A. There is no explicit funding for HIV/AIDS in the national budget.</p> <p><input checked="" type="radio"/> B. There is explicit HIV/AIDS funding within the national budget.</p> <p><input type="checkbox"/> The HIV/AIDS budget is program-based across ministries</p> <p><input checked="" type="checkbox"/> The budget includes or references indicators of progress toward national HIV/AIDS strategy goals</p> <p><input checked="" type="checkbox"/> The budget includes specific HIV/AIDS service delivery targets</p> <p><input checked="" type="checkbox"/> National budget reflects all sources of funding for HIV, including from external donors</p> | <p>11.2 Score: 0.83</p> | <p>2016-2017 National Budget</p>   | <p>The budget presents aggregate data allocated to Health</p>   |
| <p><b>11.3 Annual Goals/Targets:</b> To what extent does the national budget contain HIV/AIDS goals/targets?</p>   | <p><input type="radio"/> A. There are no HIV/AIDS goals/targets articulated in the national budget</p> <p><input checked="" type="radio"/> B. There are HIV/AIDS goals/targets articulated in the national budget.</p> <p><input checked="" type="checkbox"/> The goals/targets are measurable.</p> <p><input checked="" type="checkbox"/> Budget items/programs are linked to goals/targets.</p> <p><input checked="" type="checkbox"/> The goals/targets are routinely monitored during budget execution.</p> <p><input checked="" type="checkbox"/> The goals/targets are routinely monitored during the development of the budget.</p>  | <p>11.3 Score: 0.95</p> | <p>Min of Finance participants at the session. The team said yes there are quarterly reports that link targets, finance and achievements</p> | <p>Min of Finance says this is happening however stakeholders were curious to see the monitoring reports that link budget utilization with program outcomes</p> |
| <p><b>11.4 HIV/AIDS Budget Execution:</b> For the previous three years, what was the average execution rate for budgeted domestic HIV/AIDS resources (i.e. excluding any donor funds) at both the national and subnational level?</p> <p>(If subnational data does not exist or is not available, answer the question for the national level. Note level covered in the comments column)</p> | <p><input type="radio"/> A. There is no HIV/AIDS budget, or information is not available.</p> <p><input checked="" type="radio"/> B. 0-49% of budget executed</p> <p><input type="radio"/> C. 50-69% of budget executed</p> <p><input type="radio"/> D. 70-89% of budget executed</p> <p><input type="radio"/> E. 90% or greater of budget executed</p>   | <p>11.4 Score: 0.00</p> | <p>Budget Review Reports</p>   | <p>The resources allocated on the MOH budget are minimal hence were quickly utilized. What was budgeted and what was also available were not aligned</p>        |

|  |   |                         |  |  |
|--|---|-------------------------|--|--|
| <p><b>11.5 Donor Spending:</b> Does the Ministry of Health or Ministry of Finance routinely, and at least on an annual basis, collect all donor spending in the health sector or for HIV/AIDS-specific services?</p>   | <p><input type="radio"/> A. Neither the Ministry of Health nor the Ministry of Finance routinely collects all donor spending in the health sector or for HIV/AIDS-specific services.</p> <p><input type="radio"/> B. The Ministry of Health or Ministry of Finance routinely collects all donor spending for only HIV/AIDS-specific services.</p> <p><input type="radio"/> C. The Ministry of Health or Ministry of Finance routinely collects all donor spending all the entire health sector, including HIV/AIDS-specific services.</p>                                 | <p>11.5 Score: 0.95</p> | <p>AID Management Platform - although colleagues did not have access to it at the time of the discussion.</p> <p>The MOH Resource Mapping (supported by Gates Foundation) - was done but not an annual basis</p> |  |
| <p><b>11.6 Domestic Spending:</b> What percent of the annual national HIV response is financed with domestic public and domestic private sector HIV funding? (Domestic funding excludes out-of-pocket, Global Fund grants, and other donor resources)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p> | <p><input type="radio"/> A. None (0%) is financed with domestic funding.</p> <p><input checked="" type="radio"/> B. Very little (approx. 1-9%) is financed with domestic funding.</p> <p><input type="radio"/> C. Some (approx. 10-49%) is financed with domestic funding.</p> <p><input type="radio"/> D. Most (approx. 50-89%) is financed with domestic funding.</p> <p><input type="radio"/> E. All or almost all (approx. 90%+) is financed with domestic funding.</p>   | <p>11.6 Score: 0.83</p> | <p>HSSP 2</p>  | <p>However HIV within the overall domestic financing for health, HIV is very small</p> |
| <p><b>11.7 Health Budget Execution:</b> What was the country's execution rate of its budget for health in the most recent year's budget?</p>   | <p><input type="radio"/> A. There is no budget for health or no money was allocated.</p> <p><input type="radio"/> B. 0-49% of budget executed.</p> <p><input type="radio"/> C. 50-69% of budget executed.</p> <p><input type="radio"/> D. 70-89% of budget executed.</p> <p><input checked="" type="radio"/> E. 90% or greater of budget executed.</p>  | <p>11.7 Score: 0.95</p> |  | <p>Of the allocated funds were executed but the overall budget was underfunded</p>     |
| <p><b>11.8 Data-Driven Reprogramming:</b> Do host country government policies/systems allow for reprograming domestic investments based on new or updated program data during the government funding cycle?</p>  | <p><input type="radio"/> A. There is no system for funding cycle reprogramming.</p> <p><input type="radio"/> B. There is a policy/system that allows for funding cycle reprogramming, but is seldom used.</p> <p><input type="radio"/> C. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy, but not based on data.</p> <p><input checked="" type="radio"/> D. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy, and is based on data.</p> | <p>11.8 Score: 0.95</p> |  | <p>Parliament reviews budget and allows for memos to be used for reprogramming</p>     |
| <p><b>Domestic Resource Mobilization Score:</b></p>  |   | <p><b>5.48</b></p>      |  |  |

| 12. Technical and Allocative Efficiencies: The host country analyzes and uses relevant HIV/AIDS epidemiological, health, health workforce, and economic data to inform HIV/AIDS investment decisions. For maximizing impact, data are used to choose which high impact program services and interventions are to be implemented, where resources should be allocated, and what populations demonstrate the highest need and should be targeted (i.e. the right thing at the right place and at the right time). Unit costs are tracked and steps are taken to improve HIV/AIDS outcomes within the available resource envelope (or achieves comparable outcomes with fewer resources). |   |                         |  |

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN C

## Domain D: Strategic Information

**What Success Looks Like:** Using local and national systems, the host country government collects, analyzes and makes available timely, comprehensive, and quality HIV/AIDS data (including epidemiological, economic/financial, and performance data) that can be used to inform policy, program and funding decisions.

**13. Epidemiological and Health data:** Host Country Government routinely collects, analyzes and makes available data on the HIV/AIDS epidemic and its effects on health outcomes. HIV/AIDS epidemiological and health data include size estimates of key populations, PLHIV, HIV incidence, HIV prevalence, viral load and AIDS-related mortality rates.
