

## **Narrative Cover Sheet –South Africa, SID 2019**

Another round of PEPFAR SA's National Sustainability Profile was completed in September 2019 using the Sustainability Index and Dashboard (SID) 4.0. The process was led by the South African National AIDS Council (SANAC), GoSA, UNAIDS and PEPFAR SA, and included multisectoral partners from government and non-governmental organizations (NGOs) and civil society. The group completed the review of the index's critical sustainability elements. The SID 2019 summary will be approved through the bilateral Partnership Framework Implementation Plan (PFIP) Management Committee, and the results will be presented in various stakeholders' meetings including through the PFIP, Health Partners Forum, SANAC Civil Society Forum, and UN Joint Team.

The SA SID 4.0 demonstrated a high level of sustainability (score of 7 or higher) in twelve of the 17 critical elements, and a score of 8 or higher in an additional four elements. Six elements were identified with vulnerabilities to sustainability: civil society engagement; human resources for health (HRH); quality management; epidemiological and health data; and data for decision-making ecosystem.

Since completing the SID in 2017, there has been progress made that reduces the vulnerabilities within these four elements. For example, in the area of service delivery, ongoing investments in differentiated care and in integrated service delivery continue to increase efficiencies within the public health system. In terms of human resources for health, the substantial improvements made to leverage the strategic value of the Ward Based Primary Health Care Outreach Team program (Community Health Workers), including setting performance targets, is expected to lead to important gains in ART patient linkage and retention, all improving sustainability of the national HIV program by optimizing the value of these important community resources. In the area of commodity security and supply chain, the efforts to prepare for the transition to TLD will lead to reduced costs for this regimen, improving overall program sustainability. Finally, substantial progress in health data systems is underway, with the multi-partner investments in provincial Information Hubs that will significantly improve the quality, availability and use of data to inform effective program investments.

As noted in Section 2.2 (Investment Profile), the GoSA funds the vast majority of the HIV response in the country, with PEPFAR the next largest contributor, followed by GFATM with about 3% of the overall investment in the response. In COP19, PEPFAR SA will continue to invest in the four program elements with the weakest sustainability scores, consistent with the NDoH/PEPFAR HIV Treatment Surge Plan. The GoSA is also aware of the sustainability implications of significant PEPFAR investments in human resources through the HIV Treatment Surge.

The GFATM has made specific commitments in each of the priority areas in the new funding covering the period April 2019-March 2022. In terms of Service Delivery, the GFATM grants prioritize programming for vulnerable populations, in particular layered, comprehensive prevention programs for AGYW and key populations. In the area of HRH, GFATM funding will support community health workers and investments to increase capacity of community-based organizations to contribute sustainably to prevention and treatment objectives. The GFATM has also made commitments to TPT and ARV buffer stocks. Other donors contribute to specific geographic or program areas, including the Bill and Melinda

Gates Foundation that has invested in important formative research that informs PEPFAR investments as well as HIV-related information systems.

PEPFAR SA continues to work closely through the bilateral work streams to ensure that the COP19 investments both leverage and complement the investments of the GoSA and other donors. In particular, the USG has worked closely with the GFATM Country Coordination Mechanism (CCM) and the GFATM Fund Portfolio Manager to align the GFATM SA grants to maximize impact and to coordinate geographies to eliminate programmatic overlap. The ongoing USG participation on the CCM and GFATM Oversight Committee has resulted in increased efficiencies and proactive reprogramming to support additional effective interventions.

PEPFAR SA will continue to support activities and areas of investment that have impact on epidemic control in South Africa. Sustainability of investments and their impact is a significant consideration for all program investments made, including collaboration with the Department of Treasury. We also note that 83% of total PEPFAR SA COP19 investments are expected to be awarded to local South African organizations that will continue to contribute to the response for years to come.

## Contextual Governance Indicators

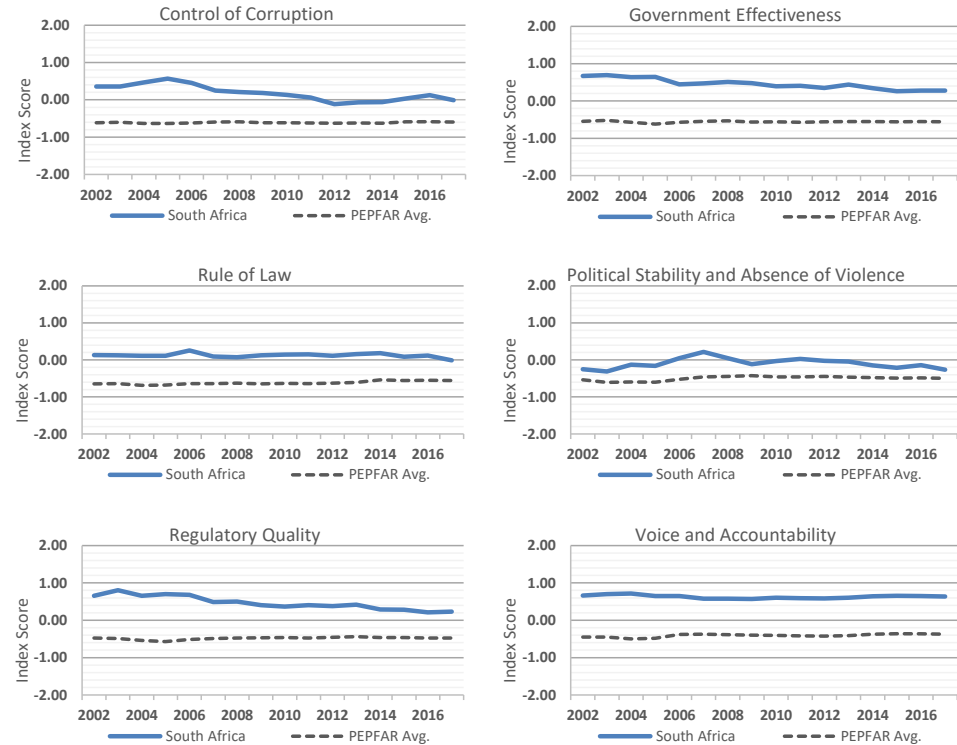

### Rule of Law Index (World Justice Project)

### Overall WJP Rule of Law Index Score

### Worldwide Governance Indicators (World Bank)

WJP's Rule of Law Index measures the general public's experience and perception across eight 'factors':

- 1. Constraints on Government Powers:** Governmental powers are limited by both internal and external checks, including auditing and review. Governmental officials are subject to the law and sanctioned for misconduct.
- 2. Absence of Corruption:** Government officials in all branches of government do not use public office for private gain.
- 3. Open Government:** Citizens have open access to government information and data, complaint mechanisms, and civic participation.
- 4. Fundamental Rights:** There is equal treatment of citizens and absence of discrimination. The rights to freedom of expression, security of the person, and due process are effectively guaranteed.
- 5. Order and Security:** Crime and civil conflict are effectively limited. Personal grievances are not redressed through violence.
- 6. Regulatory Enforcement:** Government regulations are effectively applied and enforced without improper influence. Due process is respected in administrative proceedings.
- 7. Civil Justice:** Civil justice is accessible and free of discrimination, corruption and improper government influence.
- 8. Criminal Justice:** Criminal justice is impartial, timely and effective, and free from corruption or improper government influence. There is due process of law and rights of the accused.

More information can be found at: <https://worldjusticeproject.org/our-work/research-and-data/wjp-rule-law-index-2019>

The World Bank Worldwide Governance Indicators (WGI) score countries based on six dimensions of governance:

- 1. Control of Corruption:** captures perceptions of the extent to which public power is exercised for private gain, including both petty and grand forms of corruption, as well as 'capture' of the state by elites and private interests.
- 2. Government Effectiveness:** measures the quality of public services, the quality of the civil service and its independence from political pressure, the quality of policy formulation and implementation (including the efficiency of revenue mobilization and budget management), and the credibility of the government's commitment to its stated policies.
- 3. Rule of Law:** captures perceptions of the extent to which agents have confidence in and abide by the rules of society, and in particular the quality of contract enforcement, property rights, the police, and the courts, as well as the likelihood of crime and violence.
- 4. Political Stability and Absence of Violence:** measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.
- 5. Regulatory Quality:** Measures perceptions of the ability of the government to formulate and implement sound policies and regulations that permit and promote private sector development.
- 6. Voice and Accountability:** captures perceptions of the extent to which a country's citizens are able to participate in selecting their government, as well as freedom of expression, freedom of association, and a free media.

## Domain A. Governance, Leadership, and Accountability

**What Success Looks Like:** Host government upholds a transparent and accountable resolve to be responsible to its citizens and international stakeholders for achieving planned HIV/AIDS results, is a good steward of HIV/AIDS finances, widely disseminates program progress and results, provides accurate information and education on HIV/AIDS, and supports mechanisms for eliciting feedback. Relevant government entities take actions to create an enabling policy and legal environment, ensure good stewardship of HIV/AIDS resources, create space for and promote participation of the private sector, and provide technical and political leadership to coordinate an effective national HIV/AIDS response.

**1. Planning and Coordination:** Host country develops, implements, and oversees a costed multiyear national strategy and serves as the preeminent architect and convener of a coordinated HIV/AIDS response in the country across all levels of government and key stakeholders, civil society and the private sector.

		Data Source	Notes/Comments
<p><b>1.1 Content of National Strategy:</b> Does the country have a multi-year, costed national strategy to respond to HIV?</p>	<p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. There is a multiyear national strategy. Check all that apply:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> It is costed</li> <li><input checked="" type="checkbox"/> It has measurable targets.</li> <li><input checked="" type="checkbox"/> It is updated at least every five years</li> </ul> <p>Strategy includes all crucial response components for prevention and treatment (HIV testing, treatment and care [including children and adolescents], PMTCT, transition from 'catchup' to sustainable VMMC if country performs VMMCs, scale-up of viral load, EID, and other key metrics)</p> <p><input checked="" type="checkbox"/> Strategy includes explicit plans and activities to address the needs of key populations.</p> <p><input type="checkbox"/> Strategy includes all crucial response components to mitigate the impact of HIV on vulnerable children</p> <p><input type="checkbox"/> Strategy (or separate document) includes considerations and activities related to sustainability</p>	<p>1.1 Score: 2.50</p>	<p>NSP 2017 -2022</p> <p>Country has plans by province and district</p>

<p><b>1.2 Participation in National Strategy Development:</b> Who actively participates in development of the country's national HIV/AIDS strategy?</p>	<p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. The national strategy is developed with participation from the following stakeholders (check all that apply):</p> <p><input checked="" type="checkbox"/> Its development was led by the host country government</p> <p><input checked="" type="checkbox"/> Civil society actively participated in the development of the strategy</p> <p><input checked="" type="checkbox"/> Private health sector providers, facilities, and training institutions, actively participated in the development of the strategy</p> <p>Businesses and the corporate sector actively participated in the</p> <p><input checked="" type="checkbox"/> development of the strategy including workplace development and corporate social responsibility (CSR)</p> <p>External agencies (i.e. donors, other multilateral orgs., etc.)</p> <p><input checked="" type="checkbox"/> supporting HIV services in-country participated in the development of the strategy</p>	<p>1.2 Score: 2.50</p>	<p>NSP 2017 -2022</p>	<p>Broader private sector was consulted. Stakeholders invited to make comments on the draft NSP. Some private health sector companies provided input. Consultations were precisely documented. Workshops and meeting reports are available, as well as written feedback from different spaces. Midterm review of NSP is underway and stakeholder engagement is taking place at all levels to be completed by December 2019</p>
<p><b>1.3 Coordination of National HIV Implementation:</b> To what extent does the host country government coordinate all HIV/AIDS activities implemented in the country, including those funded or implemented by CSOs, private sector, and donor implementing partners?</p>	<p>Check all that apply:</p> <p><input checked="" type="checkbox"/> There is an effective mechanism within the host country government for internally coordinating HIV/AIDS activities implemented by various government ministries, institutions, offices, etc.</p> <p><input checked="" type="checkbox"/> The host country government routinely tracks and maps HIV/AIDS activities of:</p> <p><input checked="" type="checkbox"/> civil society organizations</p> <p><input checked="" type="checkbox"/> private sector (including health care providers and/or other private sector partners)</p> <p><input checked="" type="checkbox"/> donors</p> <p>The host country government leads a mechanism or process (i.e. committee, working group, etc.) that routinely convenes key internal and external stakeholders and implementers of the national response for planning and coordination purposes.</p> <p><input checked="" type="checkbox"/> Joint operational plans are developed that include key activities of implementing organizations.</p> <p><input checked="" type="checkbox"/> Duplications and gaps among various government, CSO, private sector, and donor activities are systematically identified and addressed.</p>	<p>1.3 Score: 2.50</p>	<p>Based on discussion with stakeholders during SID workshop</p>	

<p><b>1.4 Sub-national Unit Accountability:</b> Is there a mechanism by which sub-national units are accountable to national HIV/AIDS goals or targets? (note: equal points for either checkbox under option B)</p>	<p><input checked="" type="radio"/> A. There is no formal link between the national plan and sub-national service delivery.</p> <p><input type="radio"/> B. There is a formal link between the national plan and sub-national service delivery. (Check the ONE that applies.)</p> <p><input type="checkbox"/> Sub-national units have performance targets that contribute to aggregate national goals or targets.</p> <p><input type="checkbox"/> The central government is responsible for service delivery at the sub-national level.</p>	<p>1.4 Score: 0.00</p>	<p>Annual Performance Plan, MDIPs and PIPs</p>	<p>We ticked B1 but there is scope for improvement. The question is interpreted as the national government is not responsible for service delivery, it has been decentralised to the provincial level. The Accountability scorecard has been finalised for all stakeholders. National and provinces.</p>
<p><b>Planning and Coordination Score: 7.50</b></p>				

<b>2. Policies and Governance:</b> Host country develops, implements, and oversees a wide range of policies, laws, and regulations that will achieve coverage of high impact interventions, ensure social and legal protection and equity for those accessing HIV/AIDS services, eliminate stigma and discrimination, and sustain epidemic control within the national HIV/AIDS response.		<b>Data Source</b>	<b>Notes/Comments</b>
<p><b>2.1 WHO Guidelines for ART Initiation:</b> Does current national HIV/AIDS technical practice follow current WHO guidelines for initiation of ART - i.e., optimal ART regimens for all populations (including TLD as recommended)?</p>	<p>For each category below, check yes or no to indicate if current national HIV/AIDS technical practice follows current WHO guidelines on optimal ART regimens for each of the following:</p> <p>A. Adults (&gt;19 years)</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>B. Pregnant and Breastfeeding Mothers</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>C. Adolescents (10-19 years)</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>D. Children (&lt;10 years)</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p>	<p>2.1 Score: 0.91</p>	<p>WHO guidelines; NDOH guidelines e.g. Test &amp; Treat Guidelines; Option B+, PMTCT Guidelines, TLD as recommended</p>

<p><b>2.2 Enabling Policies and Legislation:</b> Are there policies or legislation that govern HIV/AIDS service delivery or policies and legislation on health care which is inclusive of HIV service delivery?</p> <p>Note: If one of the listed policies differentiates policy for specific groups, please note in the Notes/Comments column.</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> A national public health services act that includes the control of HIV</li> <li><input checked="" type="checkbox"/> A task-shifting policy that allows trained non-physician clinicians, midwives, and nurses to initiate and dispense ART</li> <li><input type="checkbox"/> A task-shifting policy that allows trained and supervised community health workers to dispense ART between regular clinical visits</li> <li><input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced clinical visits (i.e. every 6-12 months)</li> <li><input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced ARV pickups (i.e. every 3-6 months)</li> <li><input checked="" type="checkbox"/> Policies that permit streamlined ART initiation, such as same day initiation of ART for those who are ready</li> <li><input checked="" type="checkbox"/> Legislation to ensure the well-being and protection of children, including those orphaned and made vulnerable by HIV/AIDS</li> <li><input checked="" type="checkbox"/> Policies that permit HIV self-testing</li> <li><input checked="" type="checkbox"/> Policies that permit pre-exposure prophylaxis (PrEP)</li> <li><input checked="" type="checkbox"/> Policies that permit post-exposure prophylaxis (PEP)</li> <li><input checked="" type="checkbox"/> Policies that allow HIV testing without parental consent for adolescents, starting at age 15</li> <li><input type="checkbox"/> Policies that allow HIV-infected adolescents, starting at age 15, to seek HIV treatment without parental consent</li> </ul>	<p>2.2 Score: 0.76</p>	<p>NIMART, CCMDD, Childrens Act; HTS guidelines, updated PREP guidelines</p>	<p>Provision for self screening is in the HTS guidelines. Updated PREP guidelines which is still under discussion</p>
---	---	------------------------	--	---

<p><b>2.3 User Fees for HIV Services:</b> Are HIV infected persons expected or likely to be asked to pay user fees, either formal or informal, for <u>any</u> HIV services in the public sector: clinical, laboratory, testing, prevention and others?</p> <p>Note: "Formal" user fees are those established in policy or regulation by a government or institution.</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> No, neither formal nor informal user fees exist.</p> <p><input checked="" type="checkbox"/> Yes, formal user fees exist.</p> <p><input type="checkbox"/> Yes, informal user fees exist.</p>	<p>2.3 Score: 0.23</p>	<p>Uniform patient fee schedule Available at <a href="http://www.health.gov.za/index.php/shortcodes/2015-03-29-10-42-47/2015-04-30-09-10-23/uniform-patient-fee-schedule/category/558-uniform-patient-fee-sched">www.health.gov.za/index.php/shortcodes/2015-03-29-10-42-47/2015-04-30-09-10-23/uniform-patient-fee-schedule/category/558-uniform-patient-fee-sched</a></p>	<p>Implementation varies according to provinces and walk-inns to hospital</p>
<p><b>2.4 User Fees for Other Health Services:</b> Are HIV infected persons expected or likely to be asked to pay user fees, either formal or informal, for <u>any</u> non-HIV services in the public sector, such as MCH/SRH, TB, outpatient registration, hospitalizations, and others?</p> <p>Note: "Formal" user fees are those established in policy or regulation by a government or institution.</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> No, neither formal nor informal user fees exist.</p> <p><input checked="" type="checkbox"/> Yes, formal user fees exist.</p> <p><input type="checkbox"/> Yes, informal user fees exist.</p>	<p>2.4 Score: 0.23</p>	<p>Uniform patient fee schedule Available at <a href="http://www.health.gov.za/index.php/shortcodes/2015-03-29-10-42-47/2015-04-30-09-10-23/uniform-patient-fee-schedule/category/558-uniform-patient-fee-sched">www.health.gov.za/index.php/shortcodes/2015-03-29-10-42-47/2015-04-30-09-10-23/uniform-patient-fee-schedule/category/558-uniform-patient-fee-sched</a></p>	<p>Implementation varies according to provinces and walk-inns to hospital</p>
<p><b>2.5 Data Protection:</b> Does the country have policies in place that support the collection and appropriate use of patient-level data for health, including HIV/AIDS?</p>	<p>The country has policies in place that (check all that apply):</p> <p><input checked="" type="checkbox"/> Govern the collection of patient-level data for public health purposes, including surveillance</p> <p><input type="checkbox"/> Govern the collection and use of unique identifiers such as national ID for health records</p> <p><input checked="" type="checkbox"/> Govern the privacy and confidentiality of health outcomes matched with personally identifiable information</p> <p><input checked="" type="checkbox"/> Govern the use of patient-level data, including protection against its use in criminal cases</p>	<p>2.5 Score: 0.68</p>	<p>The Protection of Personal Information (POPI) act, Public Health Act</p>	<p>Second option: lots of discussion around UPI - just not completed yet. POPI is not specific to health. UPI still under discussion Health Patient system has been ruled out</p>

<p><b>2.6 Legal Protections for Key Populations:</b> Does the country have laws or policies that specify protections (not specific to HIV) for specific populations?</p>	<p>Check all that apply:</p> <p>Transgender people (TG):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Constitutional prohibition of discrimination based on gender diversity</li> <li><input checked="" type="checkbox"/> Prohibitions of discrimination in employment based on gender diversity</li> <li><input type="checkbox"/> A third gender is legally recognized</li> <li><input type="checkbox"/> Other non-discrimination provisions specifying gender diversity (note in comments)</li> </ul> <p>Men who have sex with men (MSM):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Constitutional prohibition of discrimination based on sexual orientation</li> <li><input checked="" type="checkbox"/> Hate crimes based on sexual orientation are considered an aggravating circumstance</li> <li><input checked="" type="checkbox"/> Incitement to hatred based on sexual orientation prohibited</li> <li><input checked="" type="checkbox"/> Prohibition of discrimination in employment based on sexual orientation</li> <li><input checked="" type="checkbox"/> Other non-discrimination provisions specifying sexual orientation</li> </ul> <p>Female sex workers (FSW):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Constitutional prohibition of discrimination based on occupation</li> <li><input type="checkbox"/> Sex work is recognized as work</li> <li><input type="checkbox"/> Other non-discrimination protections specifying sex work (note in comments)</li> </ul>	<p>2.6 Score: 0.57</p>	<p>Note: This question is adapted from questions asked in the revised UNAIDS NCPI (2016). If your country has completed the new NCPI, you may use it as a data source to answer this question. Constitution of SA; Labour Relations Act; Employment Equity Act; Basic Conditions of Employment, National LGBTI plan. Sexworker plan. Criminal procedures Act. National Drug Master Plan</p>	<p>LGBTI plan and sex worker plan available and implemented but not legislated Need to define THIRD GENDER as it is unclear Cannot discriminate against a sex worker working but the act of sex work is not legalised</p>
--	--	------------------------	---	---

**2.8 Structural Obstacles:** Does the country have laws and/or policies that present barriers to delivery of HIV prevention, testing and treatment services or the accessibility of these services?

**For each question, select the most appropriate option:**

Are transgender people criminalized and/or prosecuted in the country?

- Both criminalized and prosecuted
- Criminalized
- Prosecuted
- Neither criminalized nor prosecuted

Is cross-dressing criminalized in the country?

- Yes
- Yes, only in parts of the country
- Yes, only under certain circumstances
- No

Is sex work criminalized in your country?

- Selling and buying sexual services is criminalized
- Selling sexual services is criminalized
- Buying sexual services is criminalized
- Partial criminalization of sex work
- Other punitive regulation of sex work
- Sex work is not subject to punitive regulations or is not criminalized.
- Issue is determined/differs at subnational level

2.8 Score:

0.80

Note: This question is adapted from questions asked in the revised UNAIDS NCPI (2016). If your country has completed the new NCPI, you may use it as a data source to answer this question.

ENFORCEMENT IS SUBJECTIVE IN FAVOUR OF THE BUYER.  
Conversion has commenced with law enforcement (Dignity and Diversity programme for Police)

Does the country have laws criminalizing same-sex sexual acts?

- Yes, death penalty
- Yes, imprisonment (14 years - life)
- Yes, imprisonment (up to 14 years)
- No penalty specified
- No specific legislation
- Laws penalizing same-sex sexual acts have been decriminalized or never existed

Does the country maintain the death penalty in law for people convicted of drug-related offenses?

- Yes, with high application (sentencing of people convicted of drug offenses to death and/or carrying out executions are a routine and mainstreamed part of the criminal justice system)
- Yes, with low application (executions for drug offenses may have been carried out in recent years, but in practice such penalties are relatively rare)
- Yes, with symbolic application (the death penalty for drug offenses is included in legislation, but executions are not carried out)
- No

Does the country have laws criminalizing the transmission of, non-disclosure of, or exposure to HIV transmission?

- Yes
- No, but prosecutions exist based on general criminal laws
- No

Does the country have policies restricting the entry, stay, and residence of people living with HIV (PLHIV)?

- Yes
- No

	<p>Does the country have other punitive laws affecting lesbian, gay, bisexual, transgender, and intersex (LGBTI) people?</p> <p><input type="checkbox"/> Yes, promotion ("propaganda") laws</p> <p><input type="checkbox"/> Yes, morality laws or religious norms that limit LGBTI freedom of expression and association</p> <p><input checked="" type="checkbox"/> No</p>			
<p><b>2.9 Rights to Access Services:</b> Recognizing the right to nondiscriminatory access to HIV services and support, does the government have efforts in place to educate and ensure the rights of PLHIV, key populations, adolescents, and those who may access HIV services about these rights?</p>	<p>There are host country government efforts in place as follows (check all that apply):</p> <p><input checked="" type="checkbox"/> To educate PLHIV about their legal rights in terms of access to HIV services</p> <p><input checked="" type="checkbox"/> To educate key populations about their legal rights in terms of access to HIV services</p> <p><input checked="" type="checkbox"/> National law exists regarding health care privacy and confidentiality protections</p> <p><input checked="" type="checkbox"/> Government provides financial support to enable access to legal services if someone experiences discrimination, including redress where a violation is found</p>	<p>2.9 Score: 0.91</p>	<p>IEC materials; HTA programme; The Protection of Personal Information (POPI) Act; Legal Aid South Africa, Patient Rights Charter, Human Rights Plan</p>	
<p><b>2.10 Audit:</b> Does the host country government conduct a national HIV/AIDS program audit or audit of Ministries that work on HIV/AIDS on a regular basis (excluding audits of donor funding that are through government financial systems)?</p>	<p><input type="radio"/> A. No audit is conducted of the National HIV/AIDS Program or other relevant ministry.</p> <p><input type="radio"/> B. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 4 years or more.</p> <p><input checked="" type="radio"/> C. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 3 years or less.</p>	<p>2.10 Score: 0.91</p>	<p>Annual audit reports</p>	
<p><b>2.11 Audit Action:</b> To what extent does the host country government respond to the findings of a HIV/AIDS audit or audit of Ministries that work on HIV/AIDS?</p>	<p><input type="radio"/> A. Host country government does not respond to audit findings, or no audit of the national HIV/AIDS program is conducted.</p> <p><input type="radio"/> B. The host country government does respond to audit findings by implementing changes as a result of the audit.</p> <p><input checked="" type="radio"/> C. The host country government does respond to audit findings by implementing changes which can be tracked by legislature or other bodies that hold government accountable.</p>	<p>2.11 Score: 0.91</p>	<p>Annual report to the Auditor-General</p>	
<b>Policies and Governance Score:</b>		<b>7.62</b>		

3. Civil Society Engagement: Local civil society is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, and as a key stakeholder to inform the national HIV/AIDS response. There are mechanisms for civil society to review and provide feedback regarding public programs, services and fiscal management and civil society is able to hold government institutions accountable for the use of HIV/AIDS funds and for the results of their actions.			Data Source	Notes/Comments
<b>3.1 Civil Society and Accountability for HIV/AIDS:</b> Are there any laws or policies that restrict civil society from playing an oversight role in the HIV/AIDS response?	<input type="radio"/> A. There exists a law or laws that restrict civil society from playing an oversight role in the HIV/AIDS response. <input type="radio"/> B. There are no laws that restrict civil society playing a role in providing oversight of the HIV/AIDS response but in practice, it does not happen. <input checked="" type="radio"/> C. There are no laws or policies that prevent civil society from providing an oversight of the HIV/AIDS response and civil society is very actively engaged in providing oversight.	3.1 Score: 1.67	LGBTI plan; Test&Treat; New Department of Basic Education policy; She Conquers; Self Testing policy; through SANAC Structures, SANAC pleenary and Civil Society Forum NPO Act and NPC policies and companies Act, SANAC procedural guidelines, Civil Society terms of reference.	The Plans enable measuring of accountability and oversight. There is a limitation of disability in the implementation of the policies. There is conflict of policies for sex workers as the Act limit participation or implementation of HIV/AIDS policies. Cant seperate civil society from social justice and in South Africa, policies implementation is highly skewed support to civil society. USG restrictions (GAG rule) on actions that the South African law recognizes
<b>3.2 Government Channels and Opportunities for Civil Society Engagement:</b> Does host country government have formal channels or opportunities for diverse civil society groups to engage and provide feedback on its HIV/AIDS policies, programs, and services (not including Global Fund CCM civil society engagement requirements)?	Check A, B, or C; if C checked, select appropriate disaggregates:  <input type="radio"/> A. There are no formal channels or opportunities. <input type="radio"/> B. There are formal channels or opportunities, but civil society is called upon in an ad hoc manner to provide inputs and feedback. <input checked="" type="radio"/> C. There are functional formal channels and opportunities for civil society engagement and feedback. Check all that apply:  <input checked="" type="checkbox"/> During strategic and annual planning <input checked="" type="checkbox"/> In joint annual program reviews <input checked="" type="checkbox"/> For policy development <input checked="" type="checkbox"/> As members of technical working groups <input checked="" type="checkbox"/> Involvement on government HIV/AIDS program evaluation teams <input checked="" type="checkbox"/> Involvement in surveys/studies <input checked="" type="checkbox"/> Collecting and reporting on client feedback <input checked="" type="checkbox"/> Service delivery	3.2 Score: 1.67	Provincial AIDS Council, District AIDS Councils, Checka Impilo/Nerve Centers	There are formal platforms however Civil Society lacks the capacity to engage. Capacity means research and strategic data management and resources. Fundamental flaws in supporting the Civil Society response through the PFIP process as it is a bilateral agreement excluding Civil Society. Another key vulnerable groups eg Disability Sector are once again excluded. Civil Society in South Africa wants to emphasise that Capacity to participate meaningfully in these platforms is severely challenged. There fore the scoring for this domain is not accurately depicting the true situation. PEPFAR influence in the Country leads to neglect of the remaining 25 deprioritised/ low burden districts in South Afric

<p><b>3.3 Impact of Civil Society Engagement:</b> Does civil society engagement substantively impact policy, programming, and budget decisions related to HIV/AIDS?</p>	<p>A. Civil society does not actively engage, or civil society engagement does not impact policy, programming, and budget decisions related to HIV/AIDS.</p> <p><input checked="" type="radio"/> B. Civil society's engagement impacts HIV/AIDS policy, programming, and budget decisions (check all that apply):</p> <p><input checked="" type="checkbox"/> In policy design</p> <p><input checked="" type="checkbox"/> In programmatic decision making</p> <p><input type="checkbox"/> In technical decision making</p> <p><input checked="" type="checkbox"/> In service delivery</p> <p><input type="checkbox"/> In HIV/AIDS basket or national health financing decisions</p>	<p>3.3 Score: 1.00</p>	<p>NSP 2017-2022; She Conquers; The South African Government participates on the CCM of the Global Fund; Through the AIDS Councils (reflected in the SANAC Procedural Guidelines)</p>	<p>Civil Society influences policies. Although Civil Society is consulted on program and decision making however there are limited capacity, support, broader consultation and influence on the ultimate decisions. The inequalities of open market in South Africa have a negative impact to these elements.</p>
<p><b>3.4 Domestic Funding of Civil Society:</b> To what extent are HIV/AIDS related Civil Society Organizations funded domestically (either from government, private sector, or self generated funds)?</p> <p>(if exact or approximate overall percentage known, or the percentages from the various domestic sources, please note in Comments column)</p>	<p>A. No funding (0%) for HIV/AIDS related civil society organizations comes from domestic sources.</p> <p><input checked="" type="radio"/> B. Minimal funding (approx. 1-9%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p>C. Some funding (approx. 10-49%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p>D. Most funding (approx. 50-89%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p>E. All or almost all funding (approx. 90%+) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p>	<p>3.4 Score: 0.83</p>	<p>Conditional Grants ( minimal support) are ring fenced</p>	<p>There is lack of transparency of how much of government or private sector funding supports Civil Society. Government support to Civil Society is negligible. Most Civil Society work is not funded or is with self funding. Government is not accountable to civil society on the conditional grant allocations</p>
<p><b>3.5 Civil Society Enabling Environment:</b> Are there laws, policies, or regulations in place which permit CSOs to be funded from a government budget for HIV services through open competition (from any Ministry or Department, at any level - national, regional, or local)?</p> <p>Note: This sometimes referred to as "social contracting" or "social procurement."</p>	<p>A. There is no law, policy, or regulation which permits CSOs to be funded from a government budget for HIV Services through open competition (not to include Global Fund or other donor funding to government that goes to CSOs).</p> <p><input checked="" type="radio"/> B. There is a law, policy or regulation which permits CSOs to be funded from a government budget for HIV services. Check all that apply:</p> <p><input type="checkbox"/> Competition is open and transparent (notices of opportunities are made public)</p> <p><input type="checkbox"/> Opportunities for CSO funding are made on an annual basis</p> <p><input type="checkbox"/> Awards are made in a timely manner (within 6-12 months of announcements)</p> <p><input type="checkbox"/> Payments are made to CSOs on time for provision of services</p>	<p>3.5 Score: 0.83</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Failure of policies implementation. Some provinces try to implement policies however it is poorly executed.</p>
<p><b>Civil Society Engagement Score:</b></p>		<p><b>6.00</b></p>		

4. Private Sector Engagement: Global as well as local private sector (both private health care providers and private business) is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, innovation, and as a key stakeholder to inform the national HIV/AIDS response. There are supportive policies and mechanisms for the private sector to engage and to review and provide feedback regarding public programs, services and fiscal management of the national HIV/AIDS response. The public uses the private sector for HIV service delivery at a similar level as other health care needs.			Data Source	Notes/Comments
<p><b>4.1 Government Channels and Opportunities for Private Sector Engagement:</b> Does the host country government have formal channels and opportunities for diverse private sector entities (including service delivery, corporations, and private training institutions) to engage and provide feedback on its HIV/AIDS policies, programs, and services?</p> <p>(If option B is true, check all subsequent boxes that apply.)</p>	<p><input type="radio"/> A. There are no formal channels or opportunities for private sector engagement.</p> <p><input checked="" type="radio"/> B. There are formal channels or opportunities for private sector engagement.</p> <p>i. The following private sector stakeholders formally contribute input into national or sub-national processes for HIV/AIDS planning and strategic development (check all that apply):</p> <p><input checked="" type="checkbox"/> Corporations</p> <p><input checked="" type="checkbox"/> Employers</p> <p><input checked="" type="checkbox"/> Private training institutions</p> <p><input checked="" type="checkbox"/> Private health service delivery providers</p> <p>ii. Stakeholders contribute in the following ways (check all that apply):</p> <p><input checked="" type="checkbox"/> The private sector contributes technical expertise into HIV program planning</p> <p><input checked="" type="checkbox"/> Data and strategic input into supply chain management for HIV commodities</p> <p><input checked="" type="checkbox"/> Service delivery and/or client satisfaction data from private service delivery providers is included in health sector and HIV program planning</p> <p><input checked="" type="checkbox"/> Data on staffing in private health service delivery providers</p> <p><input checked="" type="checkbox"/> Data on private training institution's human resources for health (HRH) graduates and placements are included in health sector and HIV program planning</p> <p><input checked="" type="checkbox"/> For technical advisory on best practices and delivery solutions</p>	<p>4.1 Score: 2.22</p>	<p>Private sector engagement strategy; ILO workplace programming documents</p>	<p>Private sector engagement needs to be improved. Current structure is more focused on implementation, but coordination could be enhanced</p>

	<p>iii. The national HIV/AIDS strategic plan explicitly addresses private sector's role in the HIV/AIDS response (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> The national HIV/AIDS strategic plan has a specific section that specifies the private sector's role in the HIV/AIDS response.</li> <li><input checked="" type="checkbox"/> A recent (within past 4 years) market analysis informs the private sector strategy that is included in the HIV/AIDS strategic plan</li> <li><input type="checkbox"/> The government and private sector effectively coordinates and executes a total market approach for HIV service delivery, which accounts for whether people are able and/or willing to pay for HIV services.</li> </ul>			
<p><b>4.2 Enabling Environment for Private Corporate Contributions to HIV/AIDS Programming:</b> Does the host country government have systems and policies in place that allow for private corporate contributions to HIV/AIDS programming?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Tax policies and incentives are designed to encourage corporate social responsibility efforts from companies who are contributing financial commitments and/or non-financial resources (including, but not limited to, product donations, expertise, and employee staff time).</li> <li><input type="checkbox"/> The host country government has in-house expertise in contracting services to private sector corporations when appropriate and necessary (e.g., transportation and waste management).</li> <li><input checked="" type="checkbox"/> The host country government has standards for reporting and sharing data across public and private sectors.</li> <li><input checked="" type="checkbox"/> Regulations help ensure that workplace programs align with the national HIV/AIDS program (e.g., medical leave policies, on-site testing, on-site prevention and education, anti-discrimination policies).</li> <li><input checked="" type="checkbox"/> There are strong linkage and referral networks between on-site workplace programs and public health care facilities.</li> </ul>	<p>4.2 Score: 2.50</p>	<p>Labour Relations Act (LRA), Basic Conditions of Employment Act (BCEA), Companies Act, 2013 (Corporate Social Responsibility)</p>	<p>All of the checked items are available however their implementation is weak</p>

<p><b>4.3 Enabling Environment for Private Health Service Delivery:</b> Does the host country government have systems and policies in place that allow for private health service delivery?</p> <p>Note: Full score possible without checking all boxes.</p>	<p><input type="radio"/> A. Private health service delivery providers are not legally allowed to deliver HIV/AIDS services.</p> <p><input type="radio"/> B. The host country government plans to allow private health service delivery providers to provide HIV/AIDS services in the next two years.</p> <p><input checked="" type="radio"/> C. Private health service delivery providers are legally allowed to deliver HIV/AIDS services. In addition (check all that apply):</p> <p><input checked="" type="checkbox"/> Policies are in place to ensure that private providers receive, understand, and adhere to national guidelines/protocols for ART, and appropriate quality standards and certifications.</p> <p><input checked="" type="checkbox"/> Systems are in place for service provision and/or research reporting by private facilities to the government, including guidelines for data reporting.</p> <p><input type="checkbox"/> Joint (i.e., public-private) supervision and quality oversight of private facilities.</p> <p><input type="checkbox"/> The government offers tax deductions for private facilities delivering HIV/AIDS services.</p> <p><input type="checkbox"/> The government offers tax deductions for private training institutions.</p> <p><input checked="" type="checkbox"/> The private sector is eligible to procure HIV/AIDS and/or ART commodities via public sector procurement channels and/or national medical stores</p> <p><input type="checkbox"/> The host country government has formal contracting or service-level agreement procedures to compensate private facilities for HIV/AIDS services.</p> <p><input type="checkbox"/> HIV/AIDS services received in private facilities are eligible for reimbursement through national health insurance schemes</p> <p><input checked="" type="checkbox"/> There are open competitions for private health care providers to compete for government service contracts</p> <p><input checked="" type="checkbox"/> There is a systematic and timely process for private company registration and/or testing of new health products (e.g., drugs, diagnostic kits, medical devices, etc.) that support HIV/AIDS programming</p> <p><input type="checkbox"/> The government effectively regulates the flow of subsidized commodities into the private sector.</p> <p><input type="checkbox"/> Private Banks or lenders provide access to low interest loans prioritizing private health sector small and medium-sized enterprise (SME) development and expansion.</p>	<p>4.3 Score: 1.94</p>	<p>Based on discussion with stakeholders during SID workshop</p>
--	--	------------------------	--

<p><b>4.4 Private Sector Capability and Interest:</b> Does the private sector possess the capability to support HIV/AIDS services, and do private sector stakeholders demonstrate interest in supporting the national HIV/AIDS response?</p>	<p><input type="radio"/> A. The host country government does not leverage the skill sets of the private sector for the national HIV/AIDS response.</p> <p><input type="radio"/> B. The private sector does not express interest in or actively seek out opportunities to support the national HIV/AIDS response.</p> <p><input checked="" type="radio"/> C. The private sector has expertise and has expressed interest in or actively seeks out (check all that apply):</p> <p><input checked="" type="checkbox"/> Market opportunities that align with and support the national HIV/AIDS response</p> <p><input checked="" type="checkbox"/> Opportunities to contribute financial and/or non-financial resources to the national response (including business skills, market research, logistics, communication, research and development, product design, brand awareness, and innovation)</p>	<p>4.4 Score: 2.50</p>	<p>Based on discussion with stakeholders during SID workshop</p>	
<p><b>Private Sector Engagement Score: 9.17</b></p>				

5. Public Access to Information: Host government widely disseminates timely and reliable information on the implementation of HIV/AIDS policies and programs, including goals, progress and challenges towards achieving HIV/AIDS targets, as well as fiscal information (public revenues, budgets, expenditures, large contract awards , etc.) related to HIV/AIDS. Program and audit reports are published publically. Efforts are made to ensure public has access to data through print distribution, websites, radio or other methods of disseminating information.			Source of Data	Notes/Comments
<b>5.1 Surveillance Data Transparency:</b> Does the host country government ensure that national HIV/AIDS surveillance data and analyses are made available to stakeholders and general public in a timely and useful way?	<input type="radio"/> A. The host country government does not make HIV/AIDS surveillance data available to stakeholders and the general public, or they are made available more than one year after the date of collection.  <input type="radio"/> B. The host country government makes HIV/AIDS surveillance data available to stakeholders and the general public within 6-12 months.  <input checked="" type="radio"/> C. The host country government makes HIV/AIDS surveillance data available to stakeholders and the general public within six months.	5.1 Score: 2.00	Based on discussion with stakeholders during SID workshop	
<b>5.2 Expenditure Transparency:</b> Does the host country government make annual HIV/AIDS expenditure data available to stakeholders and the public in a timely and useful way?	<input type="radio"/> A. The host country government does not track HIV/AIDS expenditures.  <input type="radio"/> B. The host country government does not make HIV/AIDS expenditure data available to stakeholders and the general public, or they are made available more than one year after the date of expenditures.  <input type="radio"/> C. The host country government makes HIV/AIDS expenditure data available to stakeholders and the general public within 6-12 months after date of expenditures.  <input checked="" type="radio"/> D. The host country government makes HIV/AIDS expenditure data available to stakeholders and the general public within six months after expenditures.	5.2 Score: 2.00	NDOH website; published reports	

<p><b>5.3 Performance and Service Delivery Transparency:</b> Does the host country government make annual HIV/AIDS program performance and service delivery data available to stakeholders and the public in a timely and useful way?</p>	<p>A. The host country government does not make HIV/AIDS program performance and service delivery data available to stakeholders and the general public or they are made available more than one year after the date of programming.</p> <p>B. The host country government makes HIV/AIDS program performance and service delivery data available to stakeholders and the general public within 6-12 months after date of programming.</p> <p>C. The host country government makes HIV/AIDS program performance and service delivery data available to stakeholders and the general public within six months after date of programming .</p> <p>At what level of detail is this performance data reported? [CHECK ALL THAT APPLY]</p> <p><input checked="" type="checkbox"/> National</p> <p><input checked="" type="checkbox"/> District</p> <p><input checked="" type="checkbox"/> Site-Level</p>	<p>5.3 Score: 1.33</p>	<p>Annual and audit reports from each government department (with published dates)</p>	
<p><b>5.4 Procurement Transparency:</b> Does the host country government make government HIV/AIDS procurements public in a timely way?</p>	<p>A. The host country government does not make any HIV/AIDS procurements.</p> <p>B. The host country government makes HIV/AIDS procurements, but neither procurement tender nor award details are publicly available.</p> <p>C. The host country government makes HIV/AIDS procurements, and tender, but not award, details are publicly available.</p> <p>D. The host country government makes HIV/AIDS procurements, and both tender and award details available.</p>	<p>5.4 Score: 2.00</p>	<p>Treasury regulation website and other government websites</p>	<p>Certain threshold (above 500,000 rand) goes through Treasury.</p>

<p><b>5.5 Institutionalized Education System:</b> Is there a government agency that is explicitly responsible for providing scientifically accurate education to the public about HIV/AIDS?</p>	<p><input type="radio"/> A. There is no government institution that is responsible for this function and no other groups provide education.</p> <p><input type="radio"/> B. There is no government institution that is responsible for this function but at least one of the following provides education:</p> <p><input type="checkbox"/> Civil society</p> <p><input type="checkbox"/> Media</p> <p><input type="checkbox"/> Private sector</p> <p><input checked="" type="radio"/> C. There is a government institution that is responsible for, and is providing, scientifically accurate information on HIV/AIDS.</p>	<p>5.5 Score: 2.00</p>	<p>Conferences; social media; GCIS; RTCs</p>	<p>Question is not clear. There is not only one government agency that is responsible. Different government agencies provide scientifically accurate information. For Health, it is through the regional training centers, GCIS, educational institutions. Government agencies have health campaigns, which include HIV/AIDS information. There are other educational campaigns.</p>
<p><b>Public Access to Information Score: 9.33</b></p>				

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN A

## Domain B. National Health System and Service Delivery

**What Success Looks Like:** Host country institutions (inclusive of government, NGOs, civil society, and the private sector), the domestic workforce, and local health systems constitute the primary vehicles through which HIV/AIDS programs and services are managed and delivered. Optimally, national, sub-national and local governments have achieved high and appropriate coverage of a range of quality, life-saving prevention, treatment, and care services and interventions. There is a high demand for HIV/AIDS services, which are accessible and affordable to poor and vulnerable populations at risk of infection (i.e. key populations, discordant couples, exposed infants), are infected and/or are affected by the HIV/AIDS epidemic.

			<b>Data Source</b>	<b>Notes/Comments</b>
<p><b>6. Service Delivery:</b> The host country government at national, sub-national and facility levels facilitates planning and management of, access to and linkages between facility- and community-based HIV services.</p>				
<p><b>6.1 Responsiveness of facility-based services to demand for HIV services:</b> Do public facilities respond to and generate demand for HIV services to meet local needs? (Check all that apply.)</p>	<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Public facilities are able to tailor services to accommodate demand (e.g., modify or add hours/days of operations; add/second additional staff during periods of high patient influx; customize scope of HIV services offered; adapt organization/model of service deliver to patient flow)</li> <li><input checked="" type="checkbox"/> Public facilities are able to situate services in proximity to high-HIV burden locations or populations (e.g., mobile clinics)</li> <li><input checked="" type="checkbox"/> There is evidence that public facilities in high burden areas and/or serving high-burden populations generate demand for HIV services</li> </ul>	<p>6.1 Score: 0.95</p>	<p>DHP, ICSM Manual NSP DHIS Program reports and Minister's 90-90-90 circular (12 August 2019)</p>	<ul style="list-style-type: none"> <li>- Q1 Facilities have the ability to adapt plans. There is need to ensure implementation thereof across all facilities.</li> <li>- Q2 Facility targets are set to ensure that high burden facilities meet their demands</li> <li>- The CHW program has increased in</li> </ul>
<p><b>6.2 Responsiveness of community-based HIV/AIDS services:</b> Has the host country standardized the design and implementation of community-based HIV services? (Check all that apply.)</p>	<p>The host country has standardized the following design and implementation components of community-based HIV/AIDS services through (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Formalized mechanisms of participation by communities, high-burden populations and/or civil society engagement in delivery or oversight of services</li> <li><input checked="" type="checkbox"/> National guidelines detailing how to operationalize HIV/AIDS services in communities</li> <li><input checked="" type="checkbox"/> Providing official recognition to skilled human resources (e.g. community health workers) working and delivering HIV services in communities</li> <li><input checked="" type="checkbox"/> Providing financial support for community-based services</li> <li><input checked="" type="checkbox"/> Providing supply chain support for community-based services</li> <li><input checked="" type="checkbox"/> Supporting linkages between facility- and community-based services through formalized bidirectional referral services (e.g., use of national reporting systems to refer and monitor referrals for completeness)</li> </ul>	<p>6.2 Score: 0.95</p>	<p>NSP, CCMDD, Aherence Guidelines, War Rooms, Community Health Care Worker Policy Conditional Grant, Community Outreach Services Grant (COS), Minister's 90-90-90 circular (12 August 2019) Program Reports Ideal Clinic Manual PHC ReEngineering</p>	<p>COS conditional grant established to fund the CHW program</p> <ul style="list-style-type: none"> <li>- CHWs have MOU or SLA at a local with CBOs and DOH</li> <li>- Referral policy and manuals in place. A revised policy is undergoing review.</li> </ul>
<p><b>6.3 Domestic Financing of Service Delivery:</b> To what extent do host country institutions (public, private, or voluntary sector) finance the delivery of HIV/AIDS services (i.e. excluding any external financial assistance from donors)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<ul style="list-style-type: none"> <li><input type="radio"/> A. <p><b>6.9 Sub-national Service Delivery Capacity:</b> Do sub-national health authorities (i.e., district, provincial) have the capacity to effectively plan and manage HIV services sufficiently to achieve sustainable epidemic control?</p>	<p>Sub-national health authorities (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Translate national policies/strategies into sub-national level HIV/AIDS strategic plan and response activities.</li> <li><input checked="" type="checkbox"/> Use epidemiologic and program data to measure effectiveness of sub-national level programs in delivering needed HIV/AIDS services in right locations.</li> <li><input type="checkbox"/> Assess current and future staffing needs based on HIV/AIDS program goals and budget realities for high burden locations.</li> <li><input checked="" type="checkbox"/> Develop sub-national level budgets that allocate resources to high burden service delivery locations.</li> <li><input type="checkbox"/> Effectively engage with civil society in program planning and evaluation of services.</li> <li><input type="checkbox"/> Design a staff performance management plan to assure that staff working at high burden sites maintain good clinical and technical skills, such as through training and/or mentorship.</li> </ul>	<p>6.9 Score: 0.48</p>	<p>DHPs DHIS Conditional Grant Business Plans Program Reports</p>	<p>Data is available, but not used efficiently</p> <ul style="list-style-type: none"> <li>- Use of epi and programmatic data needs to be strengthened at district and facility level</li> <li>- Civil Society engagement and coordination occurs but needs strengthening at each level of care</li> <li>- Provincial program and expenditure performance is closely monitored.</li> </ul>
<p><b>Service Delivery Score</b></p>		<p><b>7.00</b></p>		

			Data Source	Notes/Comments
<p><b>7. Health Workforce:</b> Health workforce staffing decisions for those working on HIV/AIDS are based on use of workforce data and are aligned with national plans. Host country has sufficient numbers and categories of competent health care workers and volunteers to provide quality HIV/AIDS prevention, care and treatment services in health facilities and in the community. Host country trains, deploys and compensates health workers providing HIV/AIDS services through local public and/or private resources and systems. Host country has a strategy or plan for transitioning staff funded by donors.</p>				
<p><b>7.1 Health Workforce Supply:</b> To what extent is the clinical health worker supply adequate to enable the volume and quality of HIV/AIDS services needed for sustained epidemic control at the facility and/or community site level?</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and skills mix of clinical health care providers</p> <p><input type="checkbox"/> The country's clinical health workers are adequately deployed to, or distributed within, facilities and communities with high HIV burden</p> <p><input checked="" type="checkbox"/> The country has developed retention schemes that address clinical health worker vacancy or attrition in high HIV burden areas</p> <p><input type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and appropriate skills mix of social service workers to deliver social services to vulnerable children</p>	<p>7.1 Score: 0.24</p>	<p>CHW Validation exercise PEPFAR HRH Assessment NDOH has approved and operationalized the Rural Retention Scheme Human Resources for Health Strategy</p>	<p>CHW Validation exercises revealed that there may be adequate staff in a given district, but there is a need to ensure that staff are deployed appropriately - Retention is supported by on-boarding retention program, rural allowance and Community Service (required post-graduation bonding).</p>
<p><b>7.2 Role of Community-based Health Workers (CHWs):</b> To what extent are community-based health workers' roles and responsibilities specified for HIV/AIDS service delivery?</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> There is a national community-based health worker (CHW) cadre that has a defined role in HIV/AIDS service delivery (e.g., through a national strategy or task-sharing framework/guidelines).</p> <p><input checked="" type="checkbox"/> Data are made available on the staffing and deployment of CHWs, including non-formalized CHWs supported by donors.</p> <p><input checked="" type="checkbox"/> The host country government officially recognizes non-formalized CHWs delivering HIV/AIDS services.</p>	<p>7.2 Score: 0.95</p>	<p>National CHW Strategy PEPFAR's Human Resource Inventory Database (HRID)</p>	<p>- CHWs now have set remuneration of 3,500 ZAR. Data available on request, but team is not aware of data accessible to the public. - PEPFAR supporting national CHW database. - While there is a broad scope of work for CHWs to support HIV self-screening, referrals and linkages, there is an opportunity to broaden their scope to HIV testing and TB symptom collection</p>
<p><b>7.3 Health Workforce Transition:</b> What is the status of transitioning PEPFAR and/or other donor supported HIV/AIDS health worker salaries to local financing/compensation?</p> <p>Note in comments column which donors have transition plans in place and timeline for transition.</p>	<p><input type="radio"/> A. There is no inventory or plan for transition of donor-supported health workers</p> <p><input checked="" type="radio"/> B. There is an inventory of donor-supported health workers, but no official plan to transition these staff to local support</p> <p><input type="radio"/> C. There is an inventory and plan for transition of donor-supported workers, but it has not yet been implemented</p> <p><input type="radio"/> D. There is an inventory and plan for donor-supported workers to be transitioned, and staff are being transitioned according to this plan</p> <p><input type="radio"/> E. No plan is necessary because all HIV/AIDS health worker salaries are already locally financed/compensated</p>	<p>7.3 Score: 0.24</p>	<p>Global Fund's Sustainability Review of Interventions Supported by the Global Fund in South Africa (July, 2018)</p>	<p>No official plan at this time. - For many Global Fund interventions, formal sustainability and transition plans do not exist</p>

<p><b>7.4 Domestic Funding for Health Workforce:</b> What proportion of health worker (doctors, nurses, midwives, and CHW) salaries are supported with domestic public or private resources (i.e. excluding donor resources)?  (if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) health worker salaries</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) health worker salaries</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) health worker salaries</p> <p><input checked="" type="radio"/> D. Host country institutions provide most (approx. 50-89%) health worker salaries</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) health worker salaries</p>	<p>7.4 Score: 2.50</p>	<p>Estimates on National Expenditure (ENE) Estimates of Provincial Revenue &amp; Expenditure (from APR and their targets and how they will be delivered)</p>	
<p><b>7.5 Pre-service Training:</b> Do current pre-service education curricula for any health workers providing HIV/AIDS services include HIV content that has been updated in last three years?  Note: List applicable cadres in the comments column.</p>	<p><input type="radio"/> A. Pre-service education institutions do not have HIV content, or HIV content used by pre-service education institutions is out of date (not updated within 3 years)</p> <p><input checked="" type="radio"/> B. Pre-service institutions have updated HIV/AIDS content within the last three years (check all that apply):</p> <p><input checked="" type="checkbox"/> Updated content reflects national standards of practice for cadres offering HIV/AIDS-related services</p> <p><input checked="" type="checkbox"/> Institutions maintain process for continuously updating content, including HIV/AIDS content</p> <p><input checked="" type="checkbox"/> Updated curricula contain training related to stigma &amp; discrimination of PLHIV</p> <p><input type="checkbox"/> Institutions track student employment after graduation to inform planning</p>	<p>7.5 Score: 0.83</p>	<p>Curricula</p>	<p>NEPI submitted national nursing curricula to national bodies for roll-out which included stigma and discrimination content.</p> <p>Cadres: Clinical associates, nurses, pharmacists</p>
<p><b>7.6 In-service Training:</b> To what extent does the host country government (through public, private, and/or voluntary sectors) plan and implement HIV/AIDS in-service training necessary to equip health workers for sustained epidemic control?  (if exact or approximate percentage known, please note in Comments column)</p>	<p>Check all that apply among A, B, C, D:</p> <p><input checked="" type="checkbox"/> A. The host country government provides the following support for in-service training in the country (check ONE):</p> <p><input type="checkbox"/> Host country government implements no (0%) HIV/AIDS related in-service training</p> <p><input type="checkbox"/> Host country government implements minimal (approx. 1-9%) HIV/AIDS related in-service training</p> <p><input checked="" type="checkbox"/> Host country government implements some (approx. 10-49%) HIV/AIDS in-service training</p> <p><input type="checkbox"/> Host country government implements most (approx. 50-89%) HIV/AIDS in-service training</p> <p><input type="checkbox"/> Host country government implements all or almost all (approx. 90%+) HIV/AIDS in-service training</p> <p><input checked="" type="checkbox"/> B. The host country government has a national plan for institutionalizing (establishing capacity within local institutions to deliver) donor-supported in-service training in HIV/AIDS</p> <p><input checked="" type="checkbox"/> C. The host country government requires continuing professional development, a form of in-service training, for re-licensure for key clinicians</p> <p><input type="checkbox"/> D. The host country government maintains a database to track training for HIV/AIDS, and allocates training based on need (e.g. focusing on high burden areas)</p>	<p>7.6 Score: 0.60</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Donor funded organizations provide in-service for their Direct Service Providers, and TA to facility and district staff. - Unsure of % of SA government implementation/support for in-service training, so keeping as-is</p>

<p><b>7.7 Health Workforce Data Collection and Use:</b> Does the country systematically collect and use health workforce data, such as through a Human Resource Information Systems (HRIS), for HIV/AIDS services and/or health workforce planning and management?</p>	<p><input type="radio"/> A. There is no HRIS in country and data on the health workforce is not collected systematically for planning and management</p> <p><input type="radio"/> B. There is no HRIS in country, but some data is collected for planning and management</p> <p><input type="checkbox"/> Registration and re-licensure data for key professionals is collected and used for planning and management</p> <p><input type="checkbox"/> MOH health worker employee data (number, cadre, and location of employment) is collected and used</p> <p><input type="checkbox"/> Routine assessments are conducted regarding health worker staffing at health facility and/or community sites</p> <p><input checked="" type="radio"/> C. There is an HRIS (an interoperable system that captures at least regulatory and deployment data on health workers) in country:</p> <p><input type="checkbox"/> The HRIS is primarily financed and managed by host country institutions</p> <p><input checked="" type="checkbox"/> There is a national strategy or approach to interoperability for HRIS</p> <p><input checked="" type="checkbox"/> The government produces HR data from the system at least annually</p> <p><input type="checkbox"/> Host country institutions use HR data from the system for planning and management (e.g. health worker deployment)</p>	<p>7.7 Score: 0.71</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>While national HRIS is in development, need to roll-out for increased use and program planning, including all partners.</p>
<p><b>7.8 Management and Monitoring of Health Workforce</b> Does an administrative entity, such as a national office or Bureau/s, exist with specific authority to manage - plan, monitor, and provide guidance - for health workforce activities in HIV service delivery sites, including training, supervision, deployments, quality assurance, and others across all sectors. <u>Select only ONE answer.</u></p>	<p><input type="radio"/> A. No, there is no entity.</p> <p><input checked="" type="radio"/> B. Yes, there is an entity, but it has limited authority, insufficient staff, and insufficient budget</p> <p><input type="radio"/> C. Yes, there is an entity with authority and sufficient staff, but not a sufficient budget.</p> <p><input type="radio"/> D. Yes, there is an entity with authority and sufficient staff and budget.</p>	<p>7.8 Score: 0.32</p>	<p>t the request of the NDOH, PEPFAR has seconded staff to support the HR unit.</p>	
<p><b>Health Workforce Score:</b></p>		<p><b>6.39</b></p>		

8. Commodity Security and Supply Chain: The National HIV/AIDS response ensures a secure, reliable and adequate supply and distribution of quality products, including drugs, lab and medical supplies, health items, and equipment required for effective and efficient HIV/AIDS prevention, diagnosis and treatment. Host country efficiently manages product selection, forecasting and supply planning, procurement, warehousing and inventory management, transportation, dispensing and waste management reducing costs while maintaining quality.			
		Data Source	Notes/Comments
<p><b>8.1 ARV Domestic Financing:</b> What is the estimated percentage of ARV procurement funded by domestic sources? (Domestic sources includes public sector and private sector but excludes donor and out-of-pocket funds)</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. This information is not known.</p> <p><input type="radio"/> B. No (0%) funding from domestic sources</p> <p><input type="radio"/> C. Minimal (approx. 1-9%) funding from domestic sources</p> <p><input type="radio"/> D. Some (approx. 10-49%) funded from domestic sources</p> <p><input type="radio"/> E. Most (approx. 50 – 89%) funded from domestic sources</p> <p><input checked="" type="radio"/> F. All or almost all (approx. 90%+) funded from domestic sources</p>	<p>8.1 Score: 0.83</p>	<p>NDoH (COP development commodity procurement profile)</p> <p>A small proportion (~3%) of funds for ARVs are provided by the Global Fund for strategic buffer. If there are shortfalls, SA government goes to Treasury to advocate additional funds</p>
<p><b>8.2 Test Kit Domestic Financing:</b> What is the estimated percentage of HIV Rapid Test Kit procurement funded by domestic sources? (Domestic sources includes public sector and private sector but excludes donor and out-of-pocket funds)</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. This information is not known</p> <p><input type="radio"/> B. No (0%) funding from domestic sources</p> <p><input type="radio"/> C. <p><b>10.2 Management and Monitoring of Laboratory Services:</b> Does an administrative entity, such as a national office or Bureau/s, exist with specific authority to manage - plan, monitor, purchase, and provide guidance - laboratory services at the regional and district level across all sectors? <u>Select only ONE answer.</u></p>	<p><input type="radio"/> A. No, there is no entity.</p> <p><input type="radio"/> B. Yes, there is an entity, but it has limited authority, insufficient staff, and insufficient budget</p> <p><input checked="" type="radio"/> C. Yes, there is an entity with authority and sufficient staff, but not a sufficient budget.</p> <p><input type="radio"/> D. Yes, there is an entity with authority and sufficient staff and budget.</p>	<p>10.2 Score: 0.89</p>	<p>Based on discussion with stakeholders during SID workshop</p>
<p><b>10.3 Regulations to Monitor Quality of Laboratories and Point of Care Testing (POCT) Sites:</b> To what extent does the host country have regulations in place to monitor the quality of its laboratories and POCT sites?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Regulations do not exist to monitor minimum quality of laboratories in the country.</p> <p><input type="radio"/> B. Regulations exist, but are not implemented (0% of laboratories and POCT sites regulated).</p> <p><input type="radio"/> C. Regulations exist, but are minimally implemented (approx. 1-9% of laboratories and POCT sites regulated).</p> <p><input type="radio"/> D. Regulations exist, but are partially implemented (approx. 10-49% of laboratories and POCT sites regulated).</p> <p><input checked="" type="radio"/> E. Regulations exist and are mostly implemented (approx. 50-89% of laboratories and POCT sites regulated).</p> <p><input type="radio"/> F. Regulations exist and are fully or almost fully implemented (approx. 90%+ of laboratories and POCT sites regulated).</p>	<p>10.3 Score: 1.00</p>	<p>NHLS HR department</p> <p>HIV- rapid test is performed in the facilities that are not under NHLS authorities, but the provinces. Lay counselors and nurses are performing the test. Counselors are most of the time trained, but nurses are not.</p>
<p><b>10.4 Capacity of Laboratory Workforce:</b> Does the host country have an adequate number of qualified laboratory personnel (human resources [HR]) in the public sector, to sustain key functions to meet the needs of PLHIV for diagnosis, monitoring treatment and viral load suppression?</p>	<p><input type="radio"/> A. There are not adequate qualified laboratory personnel to achieve sustained epidemic control</p> <p><input checked="" type="radio"/> B. There are adequate qualified laboratory personnel to perform the following key functions:</p> <p><input type="checkbox"/> HIV diagnosis by rapid testing and point-of-care testing</p> <p><input checked="" type="checkbox"/> Routine laboratory testing, including chemistry, hematology, microbiology, serology, blood banking, and malaria</p> <p><input checked="" type="checkbox"/> Complex laboratory testing, including HIV viral load, CD4 testing, and molecular assays</p> <p><input checked="" type="checkbox"/> TB diagnosis</p>	<p>10.4 Score: 1.00</p>	

<p><b>10.5 Viral Load Infrastructure:</b> Does the host country have sufficient infrastructure to test for viral load to reach sustained epidemic control?</p>	<p><input type="radio"/> A. There is not sufficient infrastructure to test for viral load.</p> <p><input checked="" type="radio"/> B. There is sufficient infrastructure to test for viral load, including:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Sufficient HIV viral load instruments</li> <li><input checked="" type="checkbox"/> All HIV viral load laboratories have an instrument maintenance program</li> <li><input checked="" type="checkbox"/> Sufficient supply chain system is in place to prevent stock out</li> <li><input checked="" type="checkbox"/> Adequate specimen transport system and timely return of results</li> </ul>	<p>10.5 Score: 1.33</p>	<p>NHLS Reports/Guidelines Viral Load dashboard is used to generate results for action Reports for all VL &gt; 1000 copies on a weekly basis, allowing HCW to call patients back before set appointment</p>	<p>Challenges in VL access for rural areas - Clinic lab interface is part of the the ICSM - Turn around time may be a challenge due to communication issues between facility and NHLS/patients and delayed equipment service and maintenance</p>
<p><b>10.6 Domestic Funds for Laboratories:</b> To what extent are laboratory services financed by domestic public or private resources (i.e. excluding external donor funding)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No (0%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> B. Minimal (approx. 1-9%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> C. Some (approx. 10-49%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> D. Most (approx. 50-89%) laboratory services are financed by domestic resources.</p> <p><input checked="" type="radio"/> E. All or almost all (approx. 90%+) laboratory services are financed by domestic resources.</p>	<p>10.6 Score: 3.33</p>	<p>NSP 2017-2022 HIV conditional Grant</p>	
<b>Laboratory Score:</b>		<b>8.89</b>		

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN B

### Domain C. Strategic Financing and Market Openness

**What Success Looks Like:** Host country government is aware of the financial resources required to effectively and efficiently meet its national HIV/AIDS prevention, care and treatment targets. HCG actively seeks, solicits and or generates the necessary financial resources, ensures sufficient resource commitments, and uses data to strategically allocate funding and maximize investments. Finally, having and effectively implementing policies that ensure leveraging markets (both nonprofit and for profit) where appropriate and enabling their participation and competition will be critical for a sustained HIV response.

Fiscal Context for Health and HIV/AIDS			Data Source	Notes/Comments
This section will not be assigned a score, but will provide additional contextual information to complement the questions in Domain C.				
1. What percentage of general government expenditures goes to health?	14%		2019 Budget Review	Average over the 2020 MTEF (2019/20 - 2021/22 fiscal years). This is % of non-interest expenditure (i.e. the denominator excludes debt service costs)
2. What is the per capita health expenditure all sources?	\$549		National Treasury Calculations (2018/19 financial year)	USD exchange rate \$1=R 14.6
3. What is the total health care expenditure all sources as a percent of GDP?	9,10%		National Treasury Calculations (2018/19 financial year)	
4. What percent of total health expenditures is financed by external resources?	2.30%		National Treasury Calculations (2018/19 financial year)	Used R10.5bn donor / R460bn total.
5. What percent of total health expenditures is financed by out of pocket spending net of household contributions to medical schemes/pre-payment schemes?	8%		Global Health Expenditure Database (WHO) (2016)	Most recent published estimate. Fairly consistent with National Treasury calculations of 7.3% and National Health Accounts report of 8% in 2017/18

11. Domestic Resource Mobilization: The partner country budgets for its HIV/AIDS response and makes adequate resource commitments and expenditures to achieve national HIV/AIDS goals for epidemic control in line with its financial ability.	Data Source	Notes/Comments
<p>Check all that apply:</p> <p>A. Yes, there is a universal, comprehensive financing scheme that integrates social health insurance, public subsidies, and national budget provisions for public health aspects (e.g., disease surveillance). It includes the following (check all that apply):</p> <p><input checked="" type="checkbox"/> ARVs are covered</p> <p><input checked="" type="checkbox"/> Non-ARV care and treatment is covered</p> <p><input checked="" type="checkbox"/> Prevention services are covered</p> <p>B. Yes, there is an affordable health insurance scheme available (check one of the following).</p> <p><input type="checkbox"/> It covers 25% or less of the population.</p> <p><input type="checkbox"/> It covers 26 to 50% of the population.</p> <p><input type="checkbox"/> It covers 51 to 75% of the population.</p> <p><input type="checkbox"/> It covers more than 75% of the population.</p> <p>C. The affordable health insurance scheme in (B.) includes the following (check all that apply):</p> <p><input type="checkbox"/> ARVs are covered.</p> <p><input type="checkbox"/> Non-ARV care and treatment services are covered.</p> <p><input type="checkbox"/> Prevention services are covered (specify in comments).</p> <p><input type="checkbox"/> It includes public subsidies for the affordability of care.</p> <p><b>11.1 Long-term Financing Strategy for HIV/AIDS:</b> Has the host country government developed a long-term financing strategy for HIV/AIDS?</p>	<p>11.1 Score: 0.32</p> <p>Based on discussion with stakeholders during SID workshop</p>	

<p><b>11.2 Domestic Budget:</b> To what extent does the national budget explicitly account for the national HIV/AIDS response?</p>	<p><input type="radio"/> A. There is no explicit funding for HIV/AIDS in the national budget.</p> <p><input checked="" type="radio"/> B. There is explicit HIV/AIDS funding within the national budget.</p> <p><input checked="" type="checkbox"/> The HIV/AIDS budget is program-based across ministries</p> <p><input checked="" type="checkbox"/> The budget includes or references indicators of progress toward national HIV/AIDS strategy goals</p> <p><input checked="" type="checkbox"/> The budget includes specific HIV/AIDS service delivery targets</p> <p><input type="checkbox"/> National budget reflects all sources of funding for HIV, including from external donors</p>	<p>11.2 Score: 0.83</p>	<p>National Estimates of National Expenditures, conditional grants ; Provincial Estimates for Revenue and Expenditure (EPR)</p>	
<p><b>11.3 Annual Goals/Targets:</b> To what extent does the national budget contain HIV/AIDS goals/targets?</p>	<p><input type="radio"/> A. There are no HIV/AIDS goals/targets articulated in the national budget</p> <p><input checked="" type="radio"/> B. There are HIV/AIDS goals/targets articulated in the national budget.</p> <p><input checked="" type="checkbox"/> The goals/targets are measurable.</p> <p><input checked="" type="checkbox"/> Budget items/programs are linked to goals/targets.</p> <p><input checked="" type="checkbox"/> The goals/targets are routinely monitored during budget execution.</p> <p><input checked="" type="checkbox"/> The goals/targets are routinely monitored during the development of the budget.</p>	<p>11.3 Score: 0.95</p>	<p>Estimates of National Expenditure, conditional grants business plans; Provincial Estimates for Revenue and Expenditure (EPR); Annual Performance Plans (APP)</p>	
<p><b>11.4 HIV/AIDS Budget Execution:</b> For the previous three years, what was the average execution rate for budgeted domestic HIV/AIDS resources (i.e. excluding any donor funds) at both the national and subnational level?</p> <p>(If subnational data does not exist or is not available, answer the question for the national level. Note level covered in the comments column)</p>	<p><input type="radio"/> A. There is no HIV/AIDS budget, or information is not available.</p> <p><input type="radio"/> B. 0-49% of budget executed</p> <p><input type="radio"/> C. 50-69% of budget executed</p> <p><input type="radio"/> D. 70-89% of budget executed</p> <p><input checked="" type="radio"/> E. 90% or greater of budget executed</p>	<p>11.4 Score: 0.95</p>	<p>Annual Financial Statements of All Relevant Departments (Annual Report), 2017/18</p>	

<p><b>11.5 Donor Spending:</b> Does the Ministry of Health or Ministry of Finance routinely, and at least on an annual basis, collect all donor spending in the health sector or for HIV/AIDS-specific services?</p>	<p>A. Neither the Ministry of Health nor the Ministry of Finance routinely collects all donor spending in the health sector or for HIV/AIDS-specific services.</p> <p><input type="radio"/> B. The Ministry of Health or Ministry of Finance routinely collects all donor spending for only HIV/AIDS-specific services.</p> <p><input type="radio"/> C. The Ministry of Health or Ministry of Finance routinely collects all donor spending all the entire health sector, including HIV/AIDS-specific services.</p>	<p>11.5 Score: 0.95</p>	<p>National Estimates of National Expenditures, conditional grants ; Provincial Estimates for Revenue and Expenditure (EPR) - 2017; Annual Report</p>	
<p><b>11.6 Domestic Spending:</b> What percent of the annual national HIV response is financed with domestic public and domestic private sector HIV funding? (Domestic funding excludes out-of-pocket, Global Fund grants, and other donor resources)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. None (0%) is financed with domestic funding.</p> <p><input type="radio"/> B. Very little (approx. 1-9%) is financed with domestic funding.</p> <p><input type="radio"/> C. Some (approx. 10-49%) is financed with domestic funding.</p> <p><input checked="" type="radio"/> D. Most (approx. 50-89%) is financed with domestic funding.</p> <p><input type="radio"/> E. All or almost all (approx. 90%+) is financed with domestic funding.</p>	<p>11.6 Score: 2.50</p>	<p>Expenditure Tracking (NDoH, DSD, DBE)</p>	
<p><b>11.7 Health Budget Execution:</b> What was the country's execution rate of its budget for health in the most recent year's budget?</p>	<p><input type="radio"/> A. There is no budget for health or no money was allocated.</p> <p><input type="radio"/> B. 0-49% of budget executed.</p> <p><input type="radio"/> C. 50-69% of budget executed.</p> <p><input type="radio"/> D. 70-89% of budget executed.</p> <p><input checked="" type="radio"/> E. 90% or greater of budget executed.</p>	<p>11.7 Score: 0.95</p>	<p>Based on discussion with stakeholders during SID workshop</p>	
<p><b>11.8 Data-Driven Reprogramming:</b> Do host country government policies/systems allow for reprogramming domestic investments based on new or updated program data during the government funding cycle?</p>	<p><input type="radio"/> A. There is no system for funding cycle reprogramming.</p> <p><input type="radio"/> B. There is a policy/system that allows for funding cycle reprogramming, but is seldom used.</p> <p><input type="radio"/> C. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy, but not based on data.</p> <p><input checked="" type="radio"/> D. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy, and is based on data.</p>	<p>11.8 Score: 0.95</p>	<p>Medium Term Budget Policy Statements; Quarterly Reviews between Treasury and all departments.</p>	
<p><b>Domestic Resource Mobilization Score:</b></p>		<p><b>8.41</b></p>		

12. Technical and Allocative Efficiencies: The host country analyzes and uses relevant HIV/AIDS epidemiological, health, health workforce, and economic data to inform HIV/AIDS investment decisions. For maximizing impact, data are used to choose which high impact program services and interventions are to be implemented, where resources should be allocated, and what populations demonstrate the highest need and should be targeted (i.e. the right thing at the right place and at the right time). Unit costs are tracked and steps are taken to improve HIV/AIDS outcomes within the available resource envelope (or achieves comparable outcomes with fewer resources).			
		Data Source	Notes/Comments
<p><b>12.1 Resource Allocation Process:</b> Does the partner country government utilize a recognized data-driven model to inform the allocation of domestic (i.e. non-donor) public HIV resources?</p> <p>If yes, please note in the comments section when the model was last used and for what purpose (e.g., for Global Fund concept note development)</p> <p>(note: full score achieved by selecting one checkbox)</p>	<p>A. The host country government does not use one of the mechanisms listed below to inform the allocation of their resources.</p> <p>B. The host country government does use the following mechanisms to inform the allocation of their resources (check all that apply):</p> <p><input type="checkbox"/> Optima</p> <p><input checked="" type="checkbox"/> Spectrum (including EPP and Goals)</p> <p><input type="checkbox"/> AIDS Epidemic Model (AEM)</p> <p><input type="checkbox"/> Modes of Transmission (MOT) Model</p> <p><input checked="" type="checkbox"/> Other recognized process or model (specify in notes column)</p>	<p>12.1 Score: 2.00</p>	<p>Thembisa; Investment Case; National ART Cost Model</p> <p>Most recent utilization was COP19 development, including site-level targeting.</p>
<p><b>12.2 Geographic Allocation:</b> Of central government HIV-specific resources (excluding any donor funds) allocated to geographic subunits in the most recent year available, what percentage is being allocated in the highest burden geographic areas (i.e. districts that cumulatively account for 80% of PLHIV)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Information not available.</p> <p><input type="radio"/> B. No resources (0%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> C. Minimal resources (approx. 1-9%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> D. Some resources (approx. 10-49%) are targeting the highest burden geographic areas.</p> <p><input checked="" type="radio"/> E. Most resources (approx. 50-89%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> F. All or almost all resources (approx. 90%+) are targeting the highest burden geographic areas.</p>	<p>12.2 Score: 1.50</p>	<p>Proportion allocations are determined + conditional grants; Division Of Revenue Act</p>

<p><b>12.3 Information on cost of service provision:</b> Does the host country government have a system that routinely produces information on the costs of providing HIV/AIDS services, and is this information used for budgeting or planning purposes?</p> <p>(note: full score can be achieved without checking all disaggregate boxes).</p>	<p><input checked="" type="radio"/> A. The host country DOES NOT have a system that routinely produces information on the costs of providing HIV/AIDS services.</p> <p><input type="radio"/> B. The host country has a system that routinely produces information on the costs of providing HIV/AIDS services, but this information is not used for budgeting or planning.</p> <p><input checked="" type="radio"/> C. The host country has a system that routinely produces information on the costs of providing HIV/AIDS services AND this information is used for budgeting or planning purposes for the following services (check all that apply):</p> <p><input checked="" type="checkbox"/> HIV Testing</p> <p><input checked="" type="checkbox"/> Laboratory services</p> <p><input checked="" type="checkbox"/> ART</p> <p><input checked="" type="checkbox"/> PMTCT</p> <p><input checked="" type="checkbox"/> VMMC</p> <p><input type="checkbox"/> OVC Service Package</p> <p><input checked="" type="checkbox"/> Key population Interventions</p> <p><input checked="" type="checkbox"/> PrEP</p>	<p>12.3 Score: 2.00</p>	<p>Based on discussion with stakeholders during SID workshop</p>
<p><b>12.4 Improving Efficiency:</b> Has the partner country achieved any of the following efficiency improvements through actions taken within the last three years?</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> Improved operations or interventions based on the findings of cost-effectiveness or efficiency studies</p> <p><input type="checkbox"/> Reduced overhead costs by streamlining management</p> <p><input checked="" type="checkbox"/> Lowered unit costs by reducing fragmentation, i.e. pooled procurement, resource pooling, etc.</p> <p><input checked="" type="checkbox"/> Improved procurement competition</p> <p><input type="checkbox"/> Integrated HIV/AIDS into national or subnational insurance schemes (private or public -- need not be within last three years)</p> <p><input type="checkbox"/> Integrated HIV into primary care services with linkages to specialist care (need not be within last three years)</p> <p><input checked="" type="checkbox"/> Integrated TB and HIV services, including ART initiation in TB treatment settings and TB screening and treatment in HIV care settings (need not be within last three years)</p>	<p>12.4 Score: 1.78</p>	<p>RT35 Tenders National Treasury; Integrated Chronic Services Management Model</p>

	<p>Integrated HIV and MCH services, including ART initiated and maintained in eligible pregnant and postpartum women and in infants at maternal and child health care settings (need not be within last three years)</p> <p>Developed and implemented other new and more efficient models of HIV service delivery (e.g., multi-month scripting, testing modalities targeted to the population profile, etc. - specify in comments)</p>			
<p><b>12.5 ARV Benchmark prices:</b> How do the costs of ARVs (most common first line regimen) purchased in the previous year by the partner government using domestic resources compare to international benchmark prices for that year?</p> <p>(Use the "factory cost" of purchased commodities, excluding transport costs, distribution costs, etc.)</p>	<p><input type="radio"/> A. Partner government did not pay for any ARVs using domestic resources in the previous year.</p> <p><input type="radio"/> B. Average price paid for ARVs by the partner government in the previous year was more than 50% greater than the international benchmark price for that regimen.</p> <p><input type="radio"/> C. Average price paid for ARVs by the partner government in the previous year was 10-50% greater than the international benchmark price for that regimen.</p> <p><input type="radio"/> D. Average price paid for ARVs by the partner government in the previous year was 1-10% greater than the international benchmark price for that regimen.</p> <p><input checked="" type="radio"/> E. Average price paid for ARVs by the partner government in the previous year was below or equal to the international benchmark price for that regimen.</p>	<p>12.5 Score: 2.00</p>	<p>RT35 Tenders National Treasury</p>	
<p><b>Technical and Allocative Efficiencies Score:</b></p>		<p><b>9.28</b></p>		

13. Market Openness: Host country and donor policies do not negatively distort the market for HIV services by reducing participation and/or competition.		Data Source	Notes/Comments
<p><b>13.1 Granting exclusive rights for services or training:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies grant exclusive rights for the government or another local provider to provide HIV services?</p> <p>Do national government or donor (e.g., PEPFAR, GFATM, etc.) polices:</p> <p>A. Restrict the provision of any one aspect of HIV prevention, testing, counseling, or treatment services to a single entity (i.e., creating a monopoly arrangement for that service)?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p> <p>B. Mandate that only government facilities have the exclusive right to provide any one aspect of HIV prevention, testing, counseling, or treatment services?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p> <p>C. Grant exclusive rights to government institutions for providing health service training?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p>	<p>13.1 Score: 0.36</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Subtle exclusivity criteria that removes and divides civil society. Financing of the response has been monopolised by donors and government. The historical apartheid system laid the foundation for this system adopted by donors and has enabled continuation. PFIIP is excluding the voice of Civil Society. PEPFAR and other donors processes of appointing Implementing Partners are not transparent. The Donors internal and exclusive process deligitimises the accountability aspect of IP to the broader structures of HIV response.</p>
<p><b>13.2 Requiring license or authorization:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies establish a license, permit or authorization process as a requirement of operation?</p> <p>A. Are health facilities required to obtain a government-mandated license or accreditation in order to provide HIV services? [SELECT ONE]</p> <p><input type="checkbox"/> No</p> <p><input type="checkbox"/> Yes, and the enforcement of the accreditation places equal burden on nongovernment facilities (e.g., FBOs, CBOs, or private sector) and government facilities.</p> <p><input checked="" type="checkbox"/> Yes, and the enforcement of the accreditation places higher burden on nongovernment facilities (e.g., FBOs, CBOs, or private sector) than on government facilities.</p> <p>B. Are health training institutions required to obtain a government-mandated license or accreditation in order to provide health service training? [SELECT ONE]</p> <p><input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> Yes, and the enforcement of the accreditation places equal burden on nongovernment institutions (e.g., FBOs, CBOs, or private sector) and government institutions.</p> <p><input type="checkbox"/> Yes, and the enforcement of the accreditation places higher burden on nongovernment institutions (e.g., FBOs, CBOs, or private sector) than on government institutions.</p>	<p>13.2 Score: 0.18</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>The challenge is with Government lack of responsibility and accountability when it comes to Key Population. 25 years later Government is unable to deliver a competent Key populations services. 12% of LGBTI people are rejected by facilities, while 6% delay seeking health services due to stigma and discrimination. The other challenge when it comes to PLHIV, the burden of care and support is led by CSOs for PLHIV, Gov is providing Treatment and relying on CSO for adherence and support.</p> <p>There are 2 types of training (Informal and formal). The CSOs at the local level must be capacitated. There is a need for parity and transformation Inequalities persist</p>

<p><b>13.3 Limiting provision of certain direct clinical services:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies limit the ability of licensed, local providers to provide certain direct clinical services?</p>	<p>National government or donor (e.g., PEPFAR, GFATM, etc.) policies limit the ability of licensed, local health service providers to offer the following HIV services:</p> <p><input checked="" type="checkbox"/> Prevention</p> <p><input checked="" type="checkbox"/> Testing and Counseling</p> <p><input checked="" type="checkbox"/> Treatment</p>	<p>13.3 Score: 0.00</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>All the thematic areas are governed by national guidelines and can be restrictive and prescriptive.</p>
<p><b>13.4 Limiting provision of certain clinical support services:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies limit the ability of licensed local providers to provide certain clinical support services?</p>	<p>A. Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies restrict the ability of licensed, local institutions from providing essential HIV laboratory services?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p> <p>B. Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies create monopoly arrangements in lab testing (i.e., arrangements where effectively only one lab service provider is allowed to conduct a certain essential HIV lab service)?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p> <p>C. National government or donor (e.g., PEPFAR, GFATM, etc.) policies restrict the ability of licensed, local institutions from procuring or distributing the following HIV commodities and supplies [PLEASE SPECIFY TYPE IN NOTES]:</p> <p><input type="checkbox"/> ARVs</p> <p><input type="checkbox"/> Test kits</p> <p><input type="checkbox"/> Laboratory supplies</p> <p><input type="checkbox"/> Other</p> <p>D. Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies create monopoly supply chain arrangements for HIV commodities (i.e., arrangements where effectively only one entity is able to supply a certain essential HIV commodity)?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p>	<p>13.4 Score: 0.36</p>	<p>Based on discussion with stakeholders during SID workshop</p>	

<p><b>13.5 Limits on local manufacturing:</b> Do national government policies limit the ability of the local manufacturing industry to compete with the international market?</p>	<p>A. Do national government policies restrict the production of HIV commodities and supplies by local manufacturers beyond international standards?</p> <p><input type="radio"/> Yes</p> <p><input checked="" type="radio"/> No</p> <p>B. [IF YES] For which of the following is local manufacturing restricted?</p> <p><input type="checkbox"/> ARVs</p> <p><input type="checkbox"/> Test kits</p> <p><input type="checkbox"/> Laboratory supplies</p> <p><input type="checkbox"/> Other</p>	<p>13.5 Score: 0.36</p>	<p>Based on discussion with stakeholders during SID workshop</p>	
<p><b>13.6 Cost of entry/exit:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies significantly raise the cost of entry or exit by a local provider?</p>	<p>Do local health service facilities face higher start-up or maintenance costs compared to government or donor (e.g., PEPFAR, GFATM, etc.) supported facilities (e.g., lack of access to funds, higher accreditation fees, prohibitive contracting costs, etc.)?</p> <p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p>	<p>13.6 Score: 0.00</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Government and donor supported facilities are provided with technical experts and other resources to assist with start up processes which local facilities that are not supported do not have. This create a capacity divide which ultimately affects costs of entry.</p>
<p><b>13.7 Geographical barriers:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies create geographical barriers for local providers to supply goods, services or labor, or invest capital?</p>	<p>A. Are certain geographical areas restricted to only government or donor-supported HIV service providers?</p> <p><input checked="" type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p>B. [IF YES] Which of the following are geographically restricted?</p> <p><input checked="" type="checkbox"/> Supplying HIV supplies and commodities</p> <p><input checked="" type="checkbox"/> Supplying HIV services or health workforce labor</p> <p><input checked="" type="checkbox"/> Investing capital (e.g., constructing or renovating facilities)</p>	<p>13.7 Score: 0.00</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>PEPFAR and other donors limit their support to 27 priority districts and marginalise the remaining deprioritised 25 districts.</p>

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN C

## Domain D: Strategic Information

**What Success Looks Like:** Using local and national systems, the host country government collects, analyzes and makes available timely, comprehensive, and quality HIV/AIDS data (including epidemiological, economic/financial, and performance data) that can be used to inform policy, program and funding decisions.

14. Epidemiological and Health data: Host Country Government routinely collects, analyzes and makes available data on the HIV/AIDS epidemic and its effects on health outcomes. HIV/AIDS epidemiological and health data include size estimates of key populations, PLHIV, HIV incidence, HIV prevalence, viral load and AIDS-related mortality rates.		Data Source	Notes/Comments
<p><b>14.1 Management and Monitoring of Surveillance Activities:</b> Does an administrative entity, such as a national office or Bureau/s, exist with specific authority to manage - plan, monitor, and provide guidance - for HIV/AIDS epidemiological surveys and/or surveillance activities including: data collection, analysis and interpretation; data storage and retrieval; and quality assurance across all sectors. <u>Select only ONE answer.</u></p>	<p><input checked="" type="radio"/> No, there is no entity.</p> <p><input type="radio"/> Yes, there is an entity, but it has limited authority, insufficient staff, and insufficient budget</p> <p><input type="radio"/> Yes, there is an entity with authority and sufficient staff, but not a sufficient budget.</p> <p><input type="radio"/> Yes, there is an entity with authority and sufficient staff and budget.</p>	<p>14.1 Score: 0.00</p> <p>Based on discussion with stakeholders during SID workshop</p>	<p>There is no single entity that oversees all Surveillance and Epi responsibilities. Responsibilities are diffused across multiple governmental, parastatal, and academic entities including: NICD, HSRC, SANAC, MRC, University of Cape Town. Surveillance activities pertain to general and key populations surveillance. Looking forward, SANAC is developing a strategic information task team that will encompass strategic planning around surveillance activities. National</p>
<p><b>14.2 Who Leads General Population Surveys &amp; Surveillance:</b> To what extent does the host country government lead and manage planning and implementation of the HIV/AIDS portfolio of general population epidemiological surveys and surveillance activities (population-based household surveys, case reporting/clinical surveillance, drug resistance surveillance, etc.)?</p>	<p><input type="radio"/> A. No HIV/AIDS general population surveys or surveillance activities have been conducted within the past 5 years</p> <p><input type="radio"/> B. Surveys &amp; surveillance activities are primarily planned and implemented by external agencies, organizations or institutions</p> <p><input type="radio"/> C. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with substantial technical assistance from external agencies</p> <p><input type="radio"/> D. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with some technical assistance from external agencies</p> <p><input checked="" type="radio"/> E. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with minimal or no technical assistance from external agencies</p>	<p>14.2 Score: 0.83</p> <p>Based on discussion with stakeholders during SID workshop</p>	<p>Agencies listed above carry out surveillance activities in collaboration with NDoH and other stakeholders. PEPFAR provides funding and at through that funding, provides technical input towards key surveillance activities.</p>
<p><b>14.3 Who Leads Key Population Surveys &amp; Surveillance:</b> To what extent does the host country government lead &amp; manage planning and implementation of the HIV/AIDS portfolio of key population epidemiological surveys and/or behavioral surveillance activities (IBBS, size estimation studies, etc.)?</p>	<p><input type="radio"/> A. No HIV/AIDS key population surveys or surveillance activities have been conducted within the past 5 years</p> <p><input type="radio"/> B. Surveys &amp; surveillance activities are primarily planned and implemented by external agencies, organizations or institutions</p> <p><input type="radio"/> C. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with substantial technical assistance from external agencies</p> <p><input checked="" type="radio"/> D. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with some technical assistance from external agencies</p> <p><input type="radio"/> E. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, without minimal or no technical assistance from external agencies</p>	<p>14.3 Score: 0.63</p> <p>Protocols for KP surveys UCSF cascades and triangulation activity report</p>	<p>Local partners conducted the most recent (2018 and 2019) key populations surveys. Workshops facilitated by SANAC convened stakeholders for dissemination of BBS, PSE and HIV clinical cascades. PEPFAR funding and technical input from PEPFAR.</p>

<p><b>14.4 Who Finances General Population Surveys &amp; Surveillance:</b> To what extent does the host country government fund the HIV/AIDS portfolio of general population epidemiological surveys and/or surveillance activities (e.g., protocol development, printing of paper-based tools, salaries and transportation for data collection, etc.)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No HIV/AIDS general population surveys or surveillance activities have been conducted within the past 5 years</p> <p><input type="radio"/> B. No financing (0%) is provided by the host country government</p> <p><input type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</p> <p><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</p> <p><input checked="" type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</p> <p><input type="radio"/> F. All or almost all financing (90% +) is provided by the host country government</p>	<p>14.4 Score: 1.25</p>	<p>Donor contributed</p>	<p>SI funds toward surveys, surveillance, and monitoring activities, and data systems support for SI FY14-FY19 totals \$27million.</p>
<p><b>14.5 Who Finances Key Populations Surveys &amp; Surveillance:</b> To what extent does the host country government fund the HIV/AIDS portfolio of key population epidemiological surveys and/or behavioral surveillance activities (e.g., protocol development, printing of paper-based tools, salaries and transportation for data collection, etc.)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No HIV/AIDS key population surveys or surveillance activities have been conducted within the past 5 years</p> <p><input type="radio"/> B. No financing (0%) is provided by the host country government</p> <p><input checked="" type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</p> <p><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</p> <p><input type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</p> <p><input type="radio"/> F. All or almost all financing (approx. 90% +) is provided by the host country government</p>	<p>14.5 Score: 0.42</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Implementation is supported by PEPFAR at &gt;90%. Global Fund no longer provides funding for KP Surveys and Surveillance. SA Government plays a significant role in the coordination and dissemination of findings from KP survey activities.</p>

<p><b>14.6 Comprehensiveness of Prevalence and Incidence Data:</b> To what extent does the host country government collect HIV prevalence and incidence data according to relevant disaggregations, populations and geographic units?</p>	<p>Check ALL boxes that apply below. (A.) refers to prevalence data. (B.) refers to incidence data:</p> <p><input checked="" type="checkbox"/> A. The host country government collects at least every 5 years HIV prevalence data disaggregated by:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Age (at coarse disaggregates)</li> <li><input checked="" type="checkbox"/> Age (at fine disaggregates)</li> <li><input checked="" type="checkbox"/> Sex</li> <li><input checked="" type="checkbox"/> Key populations (FSW, PWID, MSM, TG, prisoners)</li> <li><input type="checkbox"/> Priority populations (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users)</li> <li><input checked="" type="checkbox"/> Sub-national units</li> </ul> <p><input checked="" type="checkbox"/> B. The host country government collects at least every 5 years HIV incidence disaggregated by:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Age (at coarse disaggregates)</li> <li><input checked="" type="checkbox"/> Age (at fine disaggregates)</li> <li><input checked="" type="checkbox"/> Sex</li> <li><input type="checkbox"/> Key populations (FSW, PWID, MSM, TG, prisoners)</li> <li><input type="checkbox"/> Priority populations (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users)</li> <li><input checked="" type="checkbox"/> Sub-national units</li> </ul>	<p>14.6 Score: 0.75</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Five rounds of general population surveys were conducted in South Africa in 2002; 2005; 2008; 2012 and 2017.</p> <p>Key populations prevalence data is collected in separate bio-behavioral surveys (BBS). Recency measures have not been collected as part of prior BBS surveys.</p> <p>Data for the listed priority populations is only available for AGYW. Age (fine disaggregate) is collected for age 15-24.</p> <p>Incidence reports are based on recency testing. SA does not conduct direct incidence measures in national surveillance.</p> <p>KEY GAP: KP surveillance is geographically focused, and not at a national level. &lt;10% of KP surveillance comes from public funds.</p> <p>KEY GAP: The only priority population with data for the elements discussed in the SI tab is AGYW (comment applies to sections 14-17).</p>
---	--	-------------------------	--	--

<p><b>14.7 Comprehensiveness of Viral Load Coverage Data:</b> To what extent does the host country government collect/report viral load coverage data according to relevant disaggregations and across all PLHIV?</p> <p>(if exact or approximate percentage is known, please note in Comments column)</p>	<p><input type="radio"/> A. The host country government does not collect/report viral load coverage data or does not conduct viral load monitoring</p> <p><input checked="" type="radio"/> B. The host country government collects/reports viral load coverage data (answer both subsections below):</p> <p>Government collects/report viral load coverage data according to the following disaggregates (check ALL that apply):</p> <p><input checked="" type="checkbox"/> Age</p> <p><input checked="" type="checkbox"/> Sex</p> <p><input checked="" type="checkbox"/> Key populations (FSW, PWID, MSM, TG, prisoners)</p> <p><input type="checkbox"/> Priority populations (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users)</p> <p>For what proportion of PLHIV does the government collect/report viral load coverage data (select one of the following):</p> <p><input type="checkbox"/> Less than 25%</p> <p><input type="checkbox"/> 25-50%</p> <p><input type="checkbox"/> 50-75%</p> <p><input checked="" type="checkbox"/> More than 75%</p>	<p>14.7 Score: 0.73</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Surveys and surveillance activities include VL data by age, sex, and KP. Priority populations include only AGYW.</p> <p>Routine VL coverage data is available for general population, but not by KP. KP VL coverage data is collected only through special surveys.</p> <p>The NHLS reports capture &gt;75% of PLHIV on ART. Tier and DHIS capture &lt;75% of PLHIV on ART.</p>
<p><b>14.8 Comprehensiveness of Key and Priority Populations Data:</b> To what extent does the host country government conduct integrated behavioral surveillance (either as a standalone IBBS or integrated into other routine surveillance such as HSS+) and size estimation studies for key and priority populations? (Note: Full score possible without selecting all disaggregates.)</p> <p>Please note most recent survey dates in comments section.</p>	<p><input type="radio"/> A. The host country government does not conduct IBBS or size estimation studies for key populations (FSW, PWID, MSM, TG, prisoners) or priority populations (Military, etc.).</p> <p><input checked="" type="radio"/> B. The host country government conducts (answer both subsections below):</p> <p>IBBS (or other integrated behavioral surveillance) for (check ALL that apply):</p> <p><input checked="" type="checkbox"/> Female sex workers (FSW)</p> <p><input checked="" type="checkbox"/> Men who have sex with men (MSM)</p> <p><input checked="" type="checkbox"/> Transgender (TG)</p> <p><input checked="" type="checkbox"/> People who inject drugs (PWID)</p> <p><input checked="" type="checkbox"/> Prisoners</p> <p><input type="checkbox"/> Priority populations (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users)</p> <p>Size estimation studies for (check ALL that apply):</p> <p><input checked="" type="checkbox"/> Female sex workers (FSW)</p> <p><input checked="" type="checkbox"/> Men who have sex with men (MSM)</p> <p><input type="checkbox"/> Transgender (TG)</p> <p><input checked="" type="checkbox"/> People who inject drugs (PWID)</p> <p><input checked="" type="checkbox"/> Prisoners</p> <p><input type="checkbox"/> Priority populations (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users)</p>	<p>14.8 Score: 0.83</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>The key populations surveys are limited in geographic coverage and PSE apply only to the areas in the IBBS. Most recent IBBS and size estimation studies are:</p> <p>FSW - 2018 (Cape Town, Durban and Johannesburg)</p> <p>MSM - 2019 (Cape Town, Johannesburg and Mahikeng)</p> <p>TGW - 2018 (Cape Town, Johannesburg and Buffalo City Metro)</p> <p>PWID - 2017 (Cape Town and Tswane)</p> <p>Prisoners - 2019 (two correctional facilities, one in Gauteng and the other in Limpopo)</p> <p>Modeled size estimations have been completed for FSW, MSM, and PWID.</p> <p>Program data (enumeration), not PSE, is used to measure population size of prisoners.</p> <p>AGYW are being accessed through general population surveys, and AGYW-specific surveys including DREAMS evaluation and HERStory.</p>

<p><b>14.9 Timeliness of Epi and Surveillance Data:</b> To what extent is a timeline for the collection of epidemiologic and surveillance data outlined in a national HIV/AIDS surveillance and survey strategy (or a national surveillance and survey strategy with specifics for HIV)?</p>	<p><input type="radio"/> A. There is no national HIV surveillance and surveys strategy, or a national surveillance and surveys strategy exists but does not include specifics for HIV surveillance and surveys</p> <p><input type="radio"/> B. A national HIV surveillance and surveys strategy exists (or a national surveillance and surveys strategy exists and includes specifics for HIV), but the strategy does not outline a timeline for data collection for all relevant population groups</p> <p><input checked="" type="radio"/> C. A national HIV surveillance and surveys strategy exists (or a national surveillance and surveys strategy exists and includes specifics for HIV), and outlines a timeline for data collection for all relevant population groups</p>	<p>14.9 Score: 0.83</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>A national roadmap for Surveys and Surveillance activities with timing and scope of activities exists, and was developed in conjunction with government and donor stakeholders.</p>
<p><b>14.10 Quality of Surveillance and Survey Data:</b> To what extent does the host country government define and implement policies, procedures and governance structures that assure quality of HIV/AIDS surveillance and survey data?</p>	<p><input type="radio"/> A. No governance structures, procedures or policies designed to assure surveys &amp; surveillance data quality exist/could be documented.</p> <p><input checked="" type="radio"/> B. The following structures, procedures or policies exist to assure quality of surveys &amp; surveillance data (check all that apply):</p> <p><input type="checkbox"/> A national surveillance unit or other entity is responsible for assuring the quality of surveys &amp; surveillance data</p> <p><input type="checkbox"/> A national, approved surveys &amp; surveillance strategy is in place, which outlines standards, policies and procedures for data quality assurance</p> <p><input checked="" type="checkbox"/> Standard national procedures &amp; protocols exist for reviewing surveys &amp; surveillance data for quality and sharing feedback with appropriate staff responsible for data collection</p> <p><input checked="" type="checkbox"/> An in-country internal review board (IRB) exists and reviews all protocols.</p>	<p>14.10 Score: 0.42</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Protocols for survey activities contain policies and procedures around data quality, IRB approval, and results dissemination. However no single entity is responsible for oversight of these activities at a national level. There are provincial research committees which review protocols at provincial level. In addition, there are local institutional ethics committees. South Africa has strong IRB processes. (See note on 14.1)</p>
<p><b>Epidemiological and Health Data Score:</b></p>		<p><b>6.69</b></p>		

15. Financial/Expenditure data: Government collects, tracks and analyzes and makes available financial data related to HIV/AIDS, including the financing and spending on HIV/AIDS expenditures from all financing sources, costing, and economic evaluation, efficiency and market demand analyses for cost-effectiveness.				
			Data Source	Notes/Comments
<p><b>15.1 Who Leads Collection of Expenditure Data:</b> To what extent does the host country government lead &amp; manage a national expenditure tracking system to collect HIV/AIDS expenditure data?</p>	<p><input type="radio"/> A. No tracking of public HIV/AIDS expenditures has occurred within the past 5 years</p> <p><input type="radio"/> B. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA), but planning and implementation is primarily led by external agencies, organizations, or institutions</p> <p><input type="radio"/> C. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA) and planning and implementation is led by the host country government, with substantial external technical assistance</p> <p><input checked="" type="radio"/> D. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA) and planning and implementation is led by the host country government, with some external technical assistance</p> <p><input type="radio"/> E. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA), and planning and implementation is led by the host country government, with minimal or no external technical assistance</p>	<p>15.1 Score: 2.50</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>SA collects expenditure data through NASA. UNAIDS and Global Fund provide funding and TA for the collection of this data.</p> <p>KEY GAP: Lack of National Health Account</p>
<p><b>15.2 Comprehensiveness of Expenditure Data:</b> To what extent does the host country government collect HIV/AIDS public sector expenditures according to funding source, expenditure type, program and geographic area?</p>	<p><input type="radio"/> A. No HIV/AIDS expenditure tracking has occurred within the past 5 years</p> <p><input checked="" type="radio"/> B. HIV/AIDS expenditure data are collected (check all that apply):</p> <p><input checked="" type="checkbox"/> By source of financing, such as domestic public, domestic private, out-of-pocket, Global Fund, PEPFAR, others</p> <p><input checked="" type="checkbox"/> By expenditures per program area, such as prevention, care, treatment, health systems strengthening</p> <p><input checked="" type="checkbox"/> By type of expenditure, such as training, overhead, vehicles, supplies, commodities/reagents, personnel</p> <p><input checked="" type="checkbox"/> Sub-nationally</p>	<p>15.2 Score: 3.33</p>		<p>Information is collected from treasury, PEPFAR, and Global Fund. At subnational level, this information is tracked through NDOH Conditional Grants.</p>
<p><b>15.3 Timeliness of Expenditure Data:</b> To what extent are expenditure data collected in a timely way to inform program planning and budgeting decisions?</p>	<p><input type="radio"/> A. No HIV/AIDS expenditure data are collected</p> <p><input type="radio"/> B. HIV/AIDS expenditure data are collected irregularly, and more than 3 years ago</p> <p><input type="radio"/> C. HIV/AIDS expenditure data were collected at least once in the past 3 years</p> <p><input type="radio"/> D. HIV/AIDS expenditure data are collected annually but represent more than one year of expenditures</p> <p><input checked="" type="radio"/> E. HIV/AIDS expenditure data are collected annually and represent only one year of expenditures</p>	<p>15.3 Score: 3.33</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Information is collected from treasury, PEPFAR, and Global Fund. At subnational level, this information is tracked through NDOH Conditional Grants. Data is collected annually.</p>
<b>Financial/Expenditure Data Score:</b>		<b>9.17</b>		

16. Performance data: Government routinely collects, reports, analyzes and makes available HIV/AIDS service delivery data. Service delivery data are analyzed to track program performance, i.e. coverage of key interventions, results against targets, and the continuum of care and treatment cascade, including linkage to care, adherence and retention, and viral load testing coverage and suppression.			
		Data Source	Notes/Comments
<p><b>16.1 Who Leads Collection and Reporting of Service Delivery Data:</b> To what extent is the routine collection and reporting of HIV/AIDS service delivery data institutionalized in an information system and managed and operated by the host country government at the national level?</p>	<p><input type="radio"/> A. No system exists for routine collection of HIV/AIDS service delivery data</p> <p><input type="radio"/> B. Multiple unharmonized or parallel information systems exist that are managed and operated separately by various government entities, local institutions and/or external agencies/institutions</p> <p><input type="radio"/> C. One information system, or a harmonized set of complementary information systems, exists and is primarily managed and operated by an external agency/institution</p> <p><input checked="" type="radio"/> D. One information system, or a harmonized set of complementary information systems, exists and is managed and operated by the host country government with technical assistance from external agency/institution</p> <p><input type="radio"/> E. One information system, or a harmonized set of complementary information systems, exists and is managed and operated by the host country government</p>	<p>16.1 Score: 1.00</p>	<p>Based on discussion with stakeholders during SID workshop</p> <p>SA Government Health Information data for HIV/AIDS is intergrated and harmonized through DHIS.</p> <p>KEY GAP: Outside of the health sector, there are numerous systems that track service delivery which are not harmonized.</p>
<p><b>16.2 Who Finances Collection of Service Delivery Data:</b> To what extent does the host country government finance the routine collection of HIV/AIDS service delivery data (e.g., salaries of data clerks/M&amp;E staff, printing &amp; distribution of paper-based tools, electronic reporting system maintenance, data quality supervision, etc.)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No routine collection of HIV/AIDS service delivery data exists</p> <p><input type="radio"/> B. No financing (0%) is provided by the host country government</p> <p><input type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</p> <p><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</p> <p><input checked="" type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</p> <p><input type="radio"/> F. All or almost all financing (90% +) is provided by the host country government</p>	<p>16.2 Score: 2.50</p>	<p>Based on discussion with stakeholders during SID workshop</p> <p>PEPFAR provides financial support through secondees and a cooperative agreements with HMIS partners. Approximately 85% of the HIV response, including HMIS, is funded by the SA Government.</p> <p>There is additional financing for information systems outside of the health sector, e.g. KP is donor-funded; DSD &amp; DBE systems are primarily financed through SA Government.</p>

<p><b>16.3 Comprehensiveness of Service Delivery Data:</b> To what extent does the host country government collect HIV/AIDS service delivery data by population, program and geographic area? (Note: Full score possible without selecting all disaggregates.)</p>	<p>Check ALL boxes that apply below:</p> <p><input checked="" type="checkbox"/> A. The host country government routinely collects &amp; reports service delivery data for:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> HIV Testing</li> <li><input checked="" type="checkbox"/> PMTCT</li> <li><input checked="" type="checkbox"/> Adult Care and Support</li> <li><input checked="" type="checkbox"/> Adult Treatment</li> <li><input checked="" type="checkbox"/> Pediatric Care and Support</li> <li><input checked="" type="checkbox"/> Orphans and Vulnerable Children</li> <li><input checked="" type="checkbox"/> Voluntary Medical Male Circumcision</li> <li><input checked="" type="checkbox"/> HIV Prevention</li> <li><input checked="" type="checkbox"/> AIDS-related mortality</li> </ul> <p><input checked="" type="checkbox"/> B. Service delivery data are being collected:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> By key population (FSW, PWID, MSM, TG, prisoners)</li> <li><input type="checkbox"/> By priority population (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users)</li> <li><input checked="" type="checkbox"/> By age &amp; sex</li> <li><input checked="" type="checkbox"/> From all facility sites (public, private, faith-based, etc.)</li> <li><input type="checkbox"/> From all community sites (public, private, faith-based, etc.)</li> </ul>	<p>16.3 Score: 1.33</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>For Part A; SA National Indicator Dataset (NIDS), inclusive of the CHW / WHBOT module, encompasses all program areas listed with the exception of AIDS-related mortality. AIDS-related mortality is collected as part of national vital record reporting and is reported through StatsSA; MRC also conducts activities pertaining to AIDS-related mortality.</p> <p>Most service delivery indicators are disaggregated by age only (&lt;15/15+); However, a subset of indicators are also disaggregated by sex and reported quarterly as part of the cohort reports.</p> <p>All public-sector facilities report to the national system. Not all data from Private and Faith-Based Organizations is integrated into the national reporting system.</p> <p>PrEP provision data is collected, but is not currently integrated into national HIV/AIDS service delivery reporting.</p> <p>For part B, KP program data is collected</p>
<p><b>16.4 Timeliness of Service Delivery Data:</b> To what extent are HIV/AIDS service delivery data collected in a timely way to inform analysis of program performance?</p>	<p><input type="radio"/> A. The host country government does not routinely collect/report HIV/AIDS service delivery data</p> <p><input type="radio"/> B. The host country government collects &amp; reports service delivery data annually</p> <p><input type="radio"/> C. The host country government collects &amp; reports service delivery data semi-annually</p> <p><input checked="" type="radio"/> D. The host country government collects &amp; reports service delivery data at least quarterly</p>	<p>16.4 Score: 1.33</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Service delivery data are collected, analysed, and disseminated monthly.</p>

<p><b>16.5 Analysis of Service Delivery Data:</b> To what extent does the host country government routinely analyze service delivery data to measure program performance (i.e., continuum of care cascade, coverage, retention, viral suppression, AIDS-related mortality rates)?</p>	<p><input type="radio"/> A. The host country government does not routinely analyze service delivery data to measure program performance</p> <p><input checked="" type="radio"/> B. Service delivery data are being analyzed to measure program performance in the following ways (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Continuum of care cascade for each identified priority population (AGYW, clients of sex workers, military, mobile populations, non-injecting drug users), including HIV testing, linkage to care, treatment, adherence and retention, and viral load</li> <li><input type="checkbox"/> Continuum of care cascade for each relevant key population (FSW, PWID, MSM, TG, prisoners), including HIV testing, linkage to care, treatment, adherence and retention, and viral load</li> <li><input checked="" type="checkbox"/> Results against targets</li> <li><input checked="" type="checkbox"/> Coverage or recent achievements of key treatment &amp; prevention services (ART, PMTCT, VMMC, etc.)</li> <li><input checked="" type="checkbox"/> Site-specific yield for HIV testing (HTC and PMTCT)</li> <li><input type="checkbox"/> AIDS-related mortality rates</li> <li><input checked="" type="checkbox"/> Variations in performance by sub-national unit</li> <li><input checked="" type="checkbox"/> Creation of maps to facilitate geographic analysis</li> </ul>	<p>16.5 Score: 0.83</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Population-specific cascades are developed for adult and pediatric populations only; not for all populations listed.</p> <p>Continuum of care cascades are developed for populations by specific programs, but is not part of a national activity.</p>
<p><b>16.6 Quality of Service Delivery Data:</b> To what extent does the host country government define and implement policies, procedures and governance structures that assure quality of HIV/AIDS service delivery data?</p>	<p><input type="radio"/> A. No governance structures, procedures or policies designed to assure service delivery data quality exist/could be documented.</p> <p><input checked="" type="radio"/> B. The following structures, procedures or policies exist to assure quality of service delivery data (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> A national, approved data quality strategy is in place, which outlines standards, policies and procedures for HIV/AIDS data quality assurance</li> <li><input checked="" type="checkbox"/> A national protocol exists for routine (at least annual) Data Quality Audits/Assessments of key HIV program indicators, which are led and implemented by the host country government</li> <li><input checked="" type="checkbox"/> Standard national procedures &amp; protocols exist for routine data quality checks at the point of data entry</li> <li><input type="checkbox"/> Data quality reports are published and shared with relevant ministries/government entities &amp; partner organizations</li> <li><input type="checkbox"/> The host country government leads routine (at least annual) data review meetings at national &amp; subnational levels to review data quality issues and outline improvement plans</li> </ul>	<p>16.6 Score: 0.80</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>The data quality strategy is imbedded within the National HMIS strategy.</p> <p>KEY GAP: Routine collection, publication, and dissemination of data quality reports</p>
<p><b>Performance Data Score:</b></p>		<p><b>7.80</b></p>		

17. Data for Decision-Making Ecosystem: Host country government demonstrates commitment and capacity to advance the use of data in informing government decisions and cultivating an informed, engaged civil society.		Data Source	Notes/Comments
<p><b>17.1 Civil Registration and Vital Statistics (CRVS):</b> Is there a CRVS system in place that records births and deaths and is fully operational across the country? Is CRVS data made publically available in a timely manner?</p>	<p><input type="radio"/> A. No, there is not a CRVS system.</p> <p><input checked="" type="radio"/> B. Yes, there is a CRVS system that... (check all that apply):</p> <p><input checked="" type="checkbox"/> records births</p> <p><input checked="" type="checkbox"/> records deaths</p> <p><input checked="" type="checkbox"/> is fully operational across the country</p> <p>[IF YES] How often is CRVS data updated <u>and</u> made publically available (select only one)?</p> <p><input checked="" type="checkbox"/> A. The host country government does not make CRVS data available to the general public, or they are made available more than one year after the date of collection.</p> <p><input type="checkbox"/> B. The host country government makes CRVS data available to the general public within 6-12 months.</p> <p><input type="checkbox"/> C. The host country government makes CRVS data available to the general public within 6 months.</p>	<p>17.1 Score: 1.00</p> <p>Based on discussion with stakeholders during SID workshop</p>	<p>Data is made available from the CVRS system, but routinely it is published through StatsSA &gt;12 months after it is collected.</p>
<p><b>17.2 Unique Identification:</b> Is there a national Unique Identification system that is used to track delivery of HIV/AIDS and other health services? Do national polices protect privacy of Unique ID information?</p>	<p>Is there a national Unique Identification system that is used to track delivery of HIV/AIDS and other health services?</p> <p><input checked="" type="radio"/> A. No, there is no national Unique Identification system used to track delivery of services for HIV/AIDS or other health services.</p> <p><input type="radio"/> B. Yes, there is a national Unique Identification system used to track delivery of services for HIV/AIDS, but not other health services.</p> <p><input type="radio"/> C. Yes, there is a national Unique Identification system used to track delivery of services for HIV/AIDS and other health services.</p> <p>[IF YES TO B or C] Are there national policies, procedures and systems in place that protect the security and privacy of Unique ID information?</p> <p><input type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p>	<p>17.2 Score: 0.00</p> <p>Based on discussion with stakeholders during SID workshop</p>	<p>The Health Patient Registration Number (HPRN) is the current national unique identifier for HIV/AIDS and other health services. However, integration of HPRN across systems is not completed and implementation of the Health Patient Registration System (HRPS) is not completed in all districts. For this reason, at this time HPRN is not used to track service delivery at an individual level across HIV or other health services.</p> <p>KEY GAP: Univeral coverage and utilization of UID across all sectors is needed.</p>

<p><b>17.3 Interoperability of National Administrative Data:</b> To fully utilize all administrative data, are HIV/AIDS data and other relevant administrative data sources integrated in a data warehouse where they are joined for analysis across diseases and conditions?</p>	<p><input type="radio"/> A. No, there is no central integration of HIV/AIDS data with other relevant administrative data.</p> <p><input checked="" type="radio"/> B. Yes, national HIV/AIDS administrative data is integrated and joined with administrative data on the following:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> a. TB</li> <li><input type="checkbox"/> b. Maternal and Child Health</li> <li><input type="checkbox"/> c. Other Health Data (e.g., other communicable and non-communicable diseases)</li> <li><input type="checkbox"/> d. Education</li> <li><input type="checkbox"/> e. Health Systems Information (e.g., health workforce data)</li> <li><input type="checkbox"/> f. Poverty and Employment</li> <li><input type="checkbox"/> g. Other (specify in notes)</li> </ul>	<p>17.3 Score: 0.33</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>TB patient-level data is integrated iwth HIV data in Tier.net.</p> <p>At facility level, NIDS indicators capture TB, NCH, and Other Health Data. The district health barometer includes independent analyses of these areas, but these results are not reported in an integrated matter.</p> <p>KEY GAP: Planning and policies around data system integration are needed, and development of dashboards, visualizations, and data feedback looks using integetrated data will also be needed.</p>
<p><b>17.4 Census Data:</b> Does the host country government regularly (at least every 10 years) collect and publically disseminate census data?</p>	<p><input type="radio"/> A. No, the host country government does not collect census data at least every 10 years</p> <p><input type="radio"/> B. Yes, the host country government regularly collects census data, but does not make it available to the general public.</p> <p><input checked="" type="radio"/> C. Yes, the host country government regularly collects census data and makes it available to the general public.</p> <p>(IF YES TO C only) Data that are made available to the public are disaggregated by:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> a. Age</li> <li><input checked="" type="checkbox"/> b. Sex</li> <li><input checked="" type="checkbox"/> c. District</li> </ul>	<p>17.4 Score: 2.00</p>	<p>StatsSA</p>	
<p><b>17.5 Subnational Administrative Units:</b> Are the boundaries of subnational administrative units made public (including district and site level)?</p>	<p><input type="radio"/> A. No, the country's subnational administrative boundaries are not made public.</p> <p><input type="radio"/> B. Yes, the host country government publicizes district-level boundaries, but not site-level geocodes.</p> <p><input checked="" type="radio"/> C. Yes, the host country government publicizes district-level boundaries and site-level geocodes.</p>	<p>17.5 Score: 2.00</p>	<p>Based on discussion with stakeholders during SID workshop</p>	<p>Sub-district administrative unit boundaries are not always consistent across sectors (eg, education and health).</p> <p>KEY GAP: Misalignment of boundaries between health, education, possibly</p>
<p><b>Data for Decision-Making Ecosystem Score:</b></p>		<p><b>5.33</b></p>
